Historical foundation of intellectual property

- Intellectual property (IP) is deeply rooted in our nation's history.
 - U.S. constitution Article 1, Section 8, Clause 8: "The Congress shall have Power ... to promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries ... "

What is a patent?

The right to exclude others from:

- making, using, selling, offering for sale, or importing the claimed invention
- Limited term
- Territorial: A U.S. patent provides protection only in the United States
 - No worldwide patents

The Director

of the United observe Patient and Trainemark Office has over experienceme for a patient for a new moder angled invention. The and description of the concention are inclosed. The requirement of time have been completed with, and it has been determined do a patient on the secondary chall be granted under dhe have

Types of patents

Utility

Protects how an invention works, functions, or is made for 20 years from filing date

- Process
- Machine
- Article of manufacture
- Composition of matter

Design

Protects the way a product or article looks, the ornamental expression for 15 years from the date of grant

Plant

Protects newly invented strains of asexually reproducing flowering plants, fruit trees, and other hybrid plants for 20 years from filing date

Hurdles to patenting Is the invention:

- "Novel": e.g., the invention is new, was not described in the prior art or known
- "Non-obvious": e.g., the differences between the invention and prior art would not have been obvious to someone in that field
- Does it have "utility": e.g., does it function as intended

What is NOT patentable?

- Cannot patent an idea
 - Must be able to be developed into a new, nonobvious and useful machine, manufacture, process, or composition of matter that can actually accomplish the task
- **Cannot** patent natural phenomena
- **Cannot** patent abstract ideas

Utility applications

Provisional

- Not examined or published
- Expires after one year
- Only for utility patents

Non-Provisional

- Examined: claims required, formal requirements must be met
- Published
 - 18 months from earliest filing date
 - Unless request for non-publication at filing
- Can become a patent

United States Patent (19)	[11] Patent Number: 5,380,2
Kenyon	[45] Date of Patent: Jan. 10, 199
 [14] SNOWMAN ACCESSORY KIT [16] Investor: Robert Keayon, 1723 Jackson St., 	Primary Examinar—Robert A. Bafer Anitant Examinar—Jeffrey D. Carlson Attorney, April, or Firm—Michael I. Kroll
Scranton, Pa. 18504 [21] Appl. No.: 118,520	[57] ABSTRACT
[21] App: Po: 185,00 [32] Flatt. Sap. 9, 1993 [31] Int. Cl. ⁴ A63H 33.09 [32] US. Cl. 446,975,466,261 [33] Fahl of Search 446,975,466,261 446,975,466,261 446,975,466,261 446,975,466,261 446,975,466,261 446,975,469,261 <	An accessory kit is provided for a stowards having head, an upper tenso lody and a lower toro body a made of packat souw, which consister of a set of decor- tive articles. A structure is for inserting each of it decorative articles into the packad snow of the has the apper toric hody and the lower ione body, to n

Specification

- Written description of the invention
- How to make and use the invention
- Clear, full, concise, and exact terms to allow any person skilled in the technology of the invention to make and use the invention
- At least one specific embodiment
- Best mode
- Concludes with at least one claim (must begin on a new page)

Specification sections

- Title of the Invention
- Common sections relating to disclosure
 - Background
 - Brief summary of the invention
 - Brief description of the drawings (list of all figures by number with brief statement of what the figure depicts)
 - Detailed description of the invention
- Claims
- Abstract

Drawings

- Part of disclosure of the invention, and are required if necessary to understand the invention
 - A drawing necessary to understand the invention cannot be introduced after the filing date
- Must show every feature of the invention claimed
- Must contain as many views as necessary to show the invention

37 CFR 1.84: Two acceptable standards for Drawings:

- 1: Black and white drawings are normally required for utility and design applications
- 2: Color drawings are permitted in design applications

Brief description of the drawings

- If drawings (e.g., figures or flow diagrams) are part of the application papers, this section needs to be provided before the application is considered complete and released from initial processing
- This section must include a brief statement of what each figure depicts (e.g. a front view of the invention, an expanded view of the elements prior to assembly)

Abstract

- Starts on a separate sheet with the Heading "Abstract"
- Must be 150 words or less; 1.5 or double spaced
- Narrative form; single paragraph
- Points out what is new in the technology
- Not a repeat of the claim(s) or Brief Summary
- Written to enable the public to quickly determine the nature of the technical disclosures of the invention

See MPEP § 608.01(b) for more information

Detailed description of the invention

- Very important part of the application
- Explain the invention and the process of making and using it in full, clear, concise and exact terms.
- Focus on explaining the structures, processes or compositions of the invention.
- Refer to the figures, if applicable, and explain the different parts by use of reference numerals shown in the figures.

See MPEP § 608.01(g) for more information

Detailed description of the invention

- The detailed description should provide clear support or antecedent basis for all terms used in the claims so that the meaning of the claim terms in the claims may be ascertainable by reference to the description.
- It may be helpful to draft your claims first.
 - By doing so, you can decide on the terminology to use and make sure that terminology is consistent throughout the specification.
 - You can also figure out which terms need to be defined or explained in more detail in the specification.
 - The claims can be a checklist to make sure the detailed description provides clear support for the claims.

Claim(s)

If it is in the claim, it **must** be in the specification:

- Defines the invention and what aspects are legally enforceable
- Must conform to the invention as set forth in the remainder of the specification
- Terms and phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims are clearly understood by reference to the description

Claim(s)

- A non-provisional patent application must
 - Have at least one claim particularly pointing out and distinctly defining the invention
- A claim may be written in independent or dependent form
- A dependent claim refers to a claim previously set forth and then further limits the claimed invention
- A claim in dependent form incorporates by reference all the limitations of the claim to which it refers

Claim drafting

A claim in a Utility application or patent has three (3) main parts:

- 1. A preamble or the introduction;
- 2. A transitional phrase, such as:
 - "comprising" (open);
 - "consisting of" (closed)
- 3. A body reciting the elements of the invention.

Claim may be overly broad

Claim 1. A vehicle comprising:

a frame;

a first and second front wheel; and

a first and second rear wheel aligned and spaced behind

the first and second front wheel;

a seat connected to the frame; and

a removable top portion made of cloth;

wherein each wheel rotates and is connected to the frame.

Claim may be overly broad

Claim 1. A vehicle comprising:

a frame;

a first and second front wheel; and

a first and second rear wheel aligned and spaced behind

the first and second front wheel;

a seat connected to the frame; and

a removable top portion made of cloth;

wherein each wheel rotates and is connected to the frame.

Claim may be overly specific

Claim 1. A vehicle comprising:

<u>a motor;</u>

a yellow frame including a plurality of hinged doors;

a first and second front wheel;

a first and second rear wheel aligned and spaced behind the first and second front wheel;

a seat connected to the frame;

a plurality of glass windows connected to the frame;

two red lights connected to the frame;

two metal bumpers connected to the frame; and

a removable top portion made of cloth;

wherein each wheel is made of rubber.
