Subject: patent Re xam Proposed fee \$17,000+

Only Large companies will be able to pay the proposed fee.
Small companies and individuals holding patents will NOT be able to afford them.
This will drive more companies and individuals to register their patents overseas.

I thought the government was trying to make red tape and the cost of doing business at home (USA) easier and more friendly. GROW AMERICA! Create more jobs etc etc. Guess it's all smoke & mirrors!!
