B21C

CPC COOPERATIVE PATENT CLASSIFICATION

PERFORMING OPERATIONS; TRANSPORTING B (NOTES omitted)

SHAPING

MECHANICAL METAL-WORKING WITHOUT ESSENTIALLY REMOVING B21 MATERIAL; PUNCHING METAL (NOTES omitted)

B21C MANUFACTURE OF METAL SHEETS, WIRE, RODS, TUBES OR PROFILES, **OTHERWISE THAN BY ROLLING; AUXILIARY OPERATIONS USED IN CONNECTION WITH METAL-WORKING WITHOUT ESSENTIALLY REMOVING MATERIAL**

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

1/2.8

. . . Carriages; Connections of grippers thereto;

Grippers

Metal drawing

1/00	Manufacture of metal sheets, metal wire, metal rods, metal tubes by drawing	1/30	• • Drives, e.g. carriage-traversing mechanisms;
1/003	• {Drawing materials of special alloys so far as the composition of the alloy requires or permits special drawing methods or sequences}		Driving elements, e.g. drawing chains; Controlling the drive {(endlessly revolving chain systems for metal coiling: <u>B21C 47/3458</u>)}
1/006	• {using vibratory energy}	1/305	• • • • {Linear motor pulling devices}
1/02	Drawing metal wire or like flexible metallic	1/32	• Feeding or discharging the material or mandrels
	material by drawing machines or apparatus in which the drawing action is effected by drums	1/34	• • Guiding or supporting the material or mandrels
1/04	• • with two or more dies operating in series	3/00	Profiling tools for metal drawing; Combinations of
1/06	in which the material slips on the drums		dies and mandrels
1/08	• • in which the material does not slip on the drums	3/02	• Dies; Selection of material therefor; Cleaning thereof
1/10	with accumulation of material between	3/025	• • {comprising diamond parts}
	consecutively-arranged dies	3/04	• with non-adjustable section (<u>B21C 3/08</u> takes
1/12	• Regulating or controlling speed of drawing		precedence)
	drums, e.g. to influence tension; Drives; Stop or relief mechanisms	3/06	• with adjustable section (<u>B21C 3/08</u> takes precedence)
1/14	. Drums, e.g. capstans; Connection of grippers	3/08	• • with section defined by rollers, balls, or the like
	thereto; Grippers specially adapted for drawing	3/10	with hydraulic forces acting immediately on work
	machines or apparatus of the drum type;	3/12	. Die holders; Rotating dies
	Couplings specially adapted for these drums	3/14	Die holders combined with devices for guiding
1/16	• Metal drawing by machines or apparatus in which the drawing action is effected by other means than		the drawing material or combined with devices for cooling heating, or lubricating
	drums, e.g. by a longitudinally-moved carriage	3/16	 Mandrels; Mounting or adjusting same
	pulling or pushing the work or stock for making	3/18	• Making tools by operations not covered by a single
	metal sheets, bars, or tubes		other subclass; Repairing
1/18	• from stock of limited length ($\underline{B21C 1/22}$ takes	5/00	Defection Deale and states
	precedence)	5/00	Pointing; Push-pointing
1/20	• from stock of essentially unlimited length	5/003	• {of hollow material, e.g. tube}
1/22	(<u>B21C 1/22</u> takes precedence)	5/006	• {of solid material, e.g. wire or profiles}
1/22	• specially adapted for making tubular articles (bending sheet metal into tubular form by	9/00	Cooling, heating or lubricating drawing material
	drawing <u>B21D 5/10</u>)		(B21C $3/14$ takes precedence)
1/24	• • • by means of mandrels	9/005	• {Cold application of the lubricant (when combined
1/24	Push-bench drawing		with heating steps <u>B21C 9/00</u>)}
1/20	6	9/02	• Selection of compositions therefor
1/2/	Carriages; Drives		

23/32

. Lubrication of metal

Metal extruding

23/00	Extruding metal; Impact extrusion
23/001	• {to improve the material properties, e.g. lateral extrusion}
23/002	 {Extrusion} {Extruding materials of special alloys so far as the composition of the alloy requires or permits special extruding methods of sequences}
23/004	 {using vibratory energy}
23/004	 {Continuous extrusion starting from solid state
	material (<u>B21C 23/008</u> takes precedence)}
23/007 23/008	 {Hydrostatic extrusion} {Continuous extrusion}
23/008	 starting from material of particular form or shape,
23/01	e.g. mechanically pre-treated (<u>B21C 23/22</u> takes precedence)
23/02	• Making uncoated products
23/03	• • by both direct and backward extrusion
23/035	• • • {Making products of generally elongated
	shape}
23/04	• • by direct extrusion
23/06	Making sheets
23/08	Making wire, bars, tubes
23/085	• • • • {Making tubes (<u>B21C 23/10</u> take
	precedence)}
23/10	Making finned tubes
23/12	Extruding bent tubes or rods
23/14	Making other products
23/142	{Making profiles}
23/145	• • • • {Interlocking profiles}
23/147	• • • • {Making drill blanks (making twist-drills <u>B23P 15/32</u>)}
23/16	Making turbo blades or propellers
23/18	• by impact extrusion
23/183	• • • {by forward extrusion}
23/186	• • {by backward extrusion}
23/20	• by backward extrusion
23/205	• • {Making products of generally elongated shape}
23/21	• Presses specially adapted for extruding metal
23/211	• {Press driving devices}
23/212	• {Details (<u>B21C 23/217</u> , <u>B21C 23/218</u> take precedence)}
23/214	• • {Devices for changing die or container}
23/214	{Devices for positioning or centering press
23/213	components, e.g. die or container}
23/217	• {Tube extrusion presses (<u>B21C 23/218</u> takes precedence)}
23/218	• {Indirect extrusion presses}
23/22	• Making metal-coated products; Making products
	from two or more metals
23/24	• Covering indefinite lengths of metal or non-metal material with a metal coating
23/26	• • Applying metal coats to cables, e.g. to insulated electric cables
23/28	on intermittently-operating extrusion presses
23/30	on continuously-operating extrusion presses

B21C
Lubrication of metal being extruded or of dies, or the like, e.g. physical state of lubricant, location where lubricant is applied
ofiling tools for metal extruding
Dies
• {Selection of materials therefor}
Mandrels
Press heads, dies, or mandrels for coating work

25/00	Profiling tools for metal extruding
25/02	. Dies
25/025	• • {Selection of materials therefor}
25/04	• Mandrels
25/06	. Press heads, dies, or mandrels for coating work
25/08	Dies or mandrels with section variable during
	extruding, e.g. for making tapered work; Controlling
	variation
25/10	• Making tools by operations not covered by a single
	other subclass
26/00	Rams or plungers; Discs therefor
25/00	
27/00	Containers for metal to be extruded (<u>B21C 29/02</u>
07/00	takes precedence)
27/02	• for making coated work
27/04	• Venting metal-container chamber
29/00	Cooling or heating work or parts of the extrusion
	press; {Gas treatment of work}
29/003	• {Cooling or heating of work}
29/006	• {Gas treatment of work, e.g. to prevent oxidation or
	to create surface effects}
29/02	• {Cooling or heating} of containers for metal to be
	extruded
29/04	• {Cooling or heating} of press heads, dies or
	mandrels
31/00	Control devices, e.g. for regulating the pressing
51/00	speed or temperature of metal (<u>B21C 25/08</u>
	takes precedence): Weasuring devices, e.g. for
	takes precedence); Measuring devices, e.g. for temperature of metal, combined with or specially
	temperature of metal, combined with or specially adapted for use in connection with extrusion
	temperature of metal, combined with or specially
33/00	temperature of metal, combined with or specially adapted for use in connection with extrusion presses
33/00	temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be
33/00 33/002	temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block}
	temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} . {Encapsulated billet (manufacturing wires or fine
	<pre>temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} . {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)}</pre>
33/002 33/004	<pre>temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} . {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} . {Composite billet}</pre>
33/002	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air
33/002 33/004	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets}
33/002 33/004 33/006	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air
33/002 33/004 33/006	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers
33/002 33/004 33/006 33/008 33/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form
33/002 33/004 33/006 33/008	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses;
33/002 33/004 33/006 33/008 33/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with
33/002 33/004 33/006 33/008 33/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods <u>B21C 23/12</u>);
33/002 33/004 33/006 33/008 33/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods <u>B21C 23/12</u>); Cleaning dies, ducts, containers, or mandrels
33/002 33/004 33/006 33/008 33/02 35/00	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods <u>B21C 23/12</u>); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor)
33/002 33/004 33/006 33/008 33/02 35/00	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods <u>B21C 23/12</u>); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices <u>B21C 1/305</u>)}
33/002 33/004 33/006 33/008 33/02 35/00 35/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion,
33/002 33/004 33/006 33/008 33/02 35/00 35/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires <u>B21C 37/045</u>, <u>B21C 37/047</u>)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods <u>B21C 23/12</u>); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices <u>B21C 1/305</u>)}
33/002 33/004 33/006 33/008 33/02 35/00 35/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment
33/002 33/004 33/006 33/008 33/02 35/00 35/02	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment (B21C 35/03 takes precedence; gas treatment)
33/002 33/004 33/006 33/008 33/02 35/00 35/02 35/023	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment (B21C 35/03 takes precedence; gas treatment B21C 29/006)}
33/002 33/004 33/006 33/008 33/02 35/00 35/02 35/023	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment (B21C 35/03 takes precedence; gas treatment B21C 29/006)} * {Removing sections from the extruded work,
33/002 33/004 33/006 33/008 33/02 35/00 35/02 35/023 35/026	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment (B21C 35/03 takes precedence; gas treatment B21C 29/006)} * {Removing a strip to create an open profile}
33/002 33/004 33/006 33/008 33/02 35/00 35/02 35/023 35/026 35/03	 temperature of metal, combined with or specially adapted for use in connection with extrusion presses Feeding extrusion presses with metal to be extruded {; Loading the dummy block} {Encapsulated billet (manufacturing wires or fine wires B21C 37/045, B21C 37/047)} {Composite billet} {Consecutive billets, e.g. billet profiles allowing air expulsion or bonding of billets} {Scalping billets, e.g. for removing oxide layers prior or during extrusion} the metal being in liquid form Removing work or waste from extruding presses; Drawing-off extruded work (in connection with the extruding of bent tubes or rods B21C 23/12); Cleaning dies, ducts, containers, or mandrels Removing or drawing-off work {(linear motor pulling devices B21C 1/305)} {Work treatment directly following extrusion, e.g. further deformation or surface treatment B21C 29/006)} {Removing sections from the extruded work, e.g. removing a strip to create an open profile} Straightening the work

37/00	Manufacture of metal sheets, bars, wire, tubes or like semi-manufactured products, not otherwise provided for; Manufacture of tubes of special shape
37/02	• of sheets
37/04	 of bars or wire {(wire-like electrical connectors in or for semiconductor devices <u>H01L 24/42</u>)}
37/042	• • {Manufacture of coated wire or bars}
37/045	• • {Manufacture of wire or bars with particular section or properties}
37/047	• {of fine wires}
37/06	 of tubes or metal hoses; Combined procedures for making tubes, e.g. for making multi-wall tubes
37/065	• {starting from a specific blank, e.g. tailored blank}
37/08	• Making tubes with welded or soldered seams {(with helically arranged seams <u>B21C 37/122</u>)}
37/0803	• • • {the tubes having a special shape, e.g. polygonal tubes}
37/0807	 {Tube treating or manipulating combined with, or specially adapted for use in connection with tube making machines, e.g. drawing-off devices, cutting-off}
37/0811	• • • {removing or treating the weld bead}
37/0815	• • • {without continuous longitudinal movement of the sheet during the bending operation}
37/0818	• • • {Manufacture of tubes by drawing of strip material through dies}
37/0822	• • • {Guiding or aligning the edges of the bent sheet}
37/0826	• • • {Preparing the edges of the metal sheet with the aim of having some effect on the weld}
37/083	• • • Supply, or operations combined with supply, of strip material
37/087	• • • using rods or strips of soldering material
37/09	• • • of coated strip material {; Making multi-wall tubes}
37/10	• Making tubes with riveted seams {or with non- welded and non-soldered seams}
37/101	• • {Making of the seams}
37/102	• • • {of coated strip material (making multi-wall tubes)}
37/104	• • {the tubes having a special shape, e.g. polygonal tubes}
37/105	• • {Supply, or operations combined with supply, of strip material}
37/107	• • {Tube treating or manipulating combined with or specially adapted for use in connection with tube-making machines, e.g. drawing-off devices, cutting-off}
37/108	• • • {without continuous longitudinal movement of the sheet during the bending operation}
37/12	• Making tubes or metal hoses with helically arranged seams
37/121	• • • {with non-welded and non-soldered seams}
37/122	• • • {with welded or soldered seams}
37/123	• • • {of coated strip material; Making multi-wall tubes}
37/124	• • • {the tubes having a special shape, e.g. with corrugated wall, flexible tubes}
37/125	• • • {curved section, e.g. elbow}
37/126	• • {Supply, or operations combined with supply, of strip material}

37/127	• • • {Tube treating or manipulating combined with
	or specially adapted for use in connection
	with tube making machines, e.g. drawing-off
	devices, cutting-off}
37/128	• • • {Control or regulating devices}
37/14	Making tubes from double flat material
37/15	• • Making tubes of special shape; Making tube
	fittings {(<u>B21C 37/0803</u> , <u>B21C 37/104</u> ,
27/151	<u>B21C 37/124</u> , take precedence)}
37/151	• • {Making tubes with multiple passages}
37/152 37/153	 . {Making rifle and gunbarrels} {Making tubes with inner- and/or outer
57/155	•••• {Making tubes with inner- and/or outer guides}
37/154	• • • {Making multi-wall tubes}
37/155	• • • {Making tubes with non circular section
01/100	$(\underline{B21C 37/151}, \underline{B21C 37/154} \text{ take precedence})\}$
37/156	• • • {Making tubes with wall irregularities
	(<u>B21C 37/20, B21C 37/22</u> take precedence)}
37/157	{Perforations}
37/158	• • • • {Protrusions, e.g. dimples}
37/16	Making tubes with varying diameter in
	longitudinal direction
37/18	conical tubes
37/185	•••• {starting from sheet material}
37/20	Making helical or similar guides in or on tubes
	without removing material, e.g. by drawing same over mandrels, by pushing same through
	dies {; Making tubes with angled walls, ribbed
	tubes and tubes with decorated walls}
37/202	• • • { with guides parallel to the tube axis }
37/205	• • • • {with annular guides}
37/207	• • • • {with helical guides}
37/22	Making finned or ribbed tubes by fixing strip or
	like material to tubes
37/225	• • • • {longitudinally-ribbed tubes}
37/24	annularly-ribbed tubes
37/26	• • • helically-ribbed tubes
37/28	• • • Making tube fittings for connecting pipes, e.g.
05/000	U-pieces
37/283	{Making U-pieces (<u>B21C 37/286</u> takes
37/286	<pre>precedence)} {starting from sheet material}</pre>
37/280	(starting from sneet material) Making branched pieces, e.g. T-pieces
37/292	{Forming collars by drawing or pushing a
511272	rigid forming tool through an opening in
	the tube wall}
37/294	•••• {Forming collars by compressing a fluid or
	a yieldable or resilient mass in the tube}
37/296	{Making branched pieces starting from
	strip material; Making branched tubes by
	securing a secondary tube in an opening in
	the undeformed wall of a principal tube}
37/298	{Forming collars by flow-drilling (flow
27/20	drilling <u>B21J 5/066</u>)}
37/30	• Finishing tubes, e.g. sizing, burnishing
43/00	Devices for cleaning metal products combined
	with or specially adapted for use with machines or
10 105	apparatus provided for in this subclass
43/02	• combined with or specially adapted for use in
	connection with drawing or winding machines or
43/04	apparatus Devices for de-scaling wire or like flexible work
43/04	• • Devices for de-scaling whe of like flexible work

Auxiliary operation used in connection with metal working without essentially removing material

45/00	Separating mandrels from work or <u>vice versa</u>
47/00	Winding-up, coiling or winding-off metal wire, metal band or other flexible metal material characterised by features relevant to metal processing only (coiling wire into particular forms <u>B21F 3/00</u>)
47/003	• {Regulation of tension or speed; Braking}
47/006	 {winding-up or winding-off several parallel metal bands}
47/02	. Winding-up or coiling
47/04	• • on or in reels or drums, without using a moving guide
47/045	• • • {in rotating drums}
47/06	• • • with loaded rollers, bolts, or equivalent means holding the material on the reel or drum
47/063	• • • • {with pressure rollers only}
47/066	• • • • {with belt wrappers only}
47/08	• • without making use of a reel or drum, the first turn being formed by a stationary guide
47/10	• • by means of a moving guide
47/12	the guide moving parallel to the axis of the coil (B21C 47/14 takes precedence)
47/14	• • by means of a rotating guide, e.g. laying the material around a stationary reel or drum
47/143	{the guide being a tube}
47/146	• • • {Controlling or influencing the laying pattern of the coils}
47/16	• Unwinding or uncoiling
47/18	. from reels or drums
47/20	• • the unreeled material moving transversely to the tangent line of the drum, e.g. axially, radially
47/22	• • Unwinding coils without reels or drums
47/24	 Transferring coils to or from winding apparatus or to or from operative position therein; Preventing uncoiling during transfer
47/242	• {Devices for swinging the coil from horizontal to
47/242	 (Devices for swinging the control nonzontal to vertical, or <u>vice versa</u>) (Devices for the replacement of full reels by
1//210	empty reels or <u>vice versa</u> , without considerable loss of time}
47/247	• • {Joining wire or band ends}
47/26	• Special arrangements with regard to simultaneous or subsequent treatment of the material
47/262	• {Treatment of a wire, while in the form of overlapping non-concentric rings}
47/265	• • {"helicofil" systems}
47/267	• • {Scrap treatment}
47/28	• Drums or other coil-holders
47/30	• • expansible or contractible
47/32	 Tongs or gripping means specially adapted for reeling operations
47/323	• • {Slits or pinces on the cylindrical wall of a reel or bobbin, adapted to grip the end of the material being wound}
47/326	• {Devices for pressing the end of the material being wound against the cylindrical wall of the reel or bobbin}
47/34	• Feeding or guiding devices not specially adapted to a particular type of apparatus

99/00	Subject matter not provided for in other groups of
51/005	the production or manipulation of material in accordance with subclasses <u>B21B</u> - <u>B21F</u> . {Marking devices}
51/00	Measuring, gauging, indicating, counting, or marking devices specially adapted for use in
49/00	Devices for temporarily accumulating material
47/3491	{Brushes}
47/3483	· · · ·
47/3475	
47/3466	
47/3458	{Endlessly revolving chain systems (metal drawing <u>B21C 1/30</u>)}
47/345	• • {for monitoring the tension or advance of the material}
47/3441	• • • {Diverting the leading end, e.g. from main flow to a coiling device}
	from or to a coiler}
47/3433	
47/3425	
47/3416	material }•• { with lateral edge contact }
47/3408	

be} encing the laying pattern oving transversely
