CPC COOPERATIVE PATENT CLASSIFICATION

B PERFORMING OPERATIONS; TRANSPORTING

(NOTES omitted)

SHAPING

B25 HAND TOOLS; PORTABLE POWER-DRIVEN TOOLS; MANIPULATORS (NOTE omitted)

PERCUSSIVE TOOLS {(percussive machines for forging <u>B21J</u>; hand-held drilling machines, in general <u>B23B 45/00</u>, for wood <u>B27C 3/08</u>; drilling machines, used for mining or quarrying, with reciprocating tool which is turned intermittently when out of contact with the working face <u>E21B 1/00</u>)}

WARNINGS

1. The following IPC groups are not in the CPC scheme. The subject matter for these IPC groups is classified in the following CPC groups:

B25D 13/00	covered by	B25D 11/064
B25D 15/00	covered by	B25D 11/066
B25D 15/02	covered by	B25D 11/068
B25D 17/10	covered by	B25D 17/00
B25D 17/14	covered by	B23Q 11/0042
B25D 17/16	covered by	B23Q 11/0042
B25D 17/18	covered by	B23Q 11/0042

2. In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

1/00	Hand hammers {(handles therefor <u>B25G 1/00</u> ;	9/005	• {Devices for testing the tool's performance}
	attachment of handles to the hammer head	9/02	• of the tool-carrier piston type, i.e. in which the tool
	B25G 3/00) }; Hammer heads of special shape or		is connected to an impulse member
	materials	9/04	• of the hammer piston type, i.e. in which the tool bit
1/005	{with nail feeding devices}		or anvil is hit by an impulse member
1/02	 Inserts or attachments forming the striking part 	9/06	 Means for driving the impulse member
	of hammer heads (<u>B25D 1/08</u> - <u>B25D 1/14</u> take precedence)	9/08	 comprising a built-in air compressor {, i.e. the tool being driven by air pressure}
1/04	 with provision for withdrawing or holding nails or 	9/10	comprising a built-in internal-combustion engine
	spikes	9/11	operated by combustion pressure generated by
1/045	• • {with fulcrum member for extracting long nails}		detonation of a cartridge
1/06	Magnetic holders	9/12	• comprising a built-in liquid motor {, i.e. the tool
1/08	 having deformable heads (<u>B25D 1/12</u> takes 		being driven by hydraulic pressure}
	precedence)	9/125	• • • {driven directly by liquid pressure working
1/10	 having work protector surrounding faces 		with pulses}
	$\{(\underline{\text{B25D }1/12} \text{ takes precedence})\}$	9/14	 Control devices for the reciprocating piston
1/12	 having shock-absorbing means 	9/145	• • {for hydraulically actuated hammers having an
1/14	 having plural striking faces 		accumulator}
1/16	 having the impacting head in the form of a sleeve 	9/16	• Valve arrangements therefor {(B25D 9/145 takes
	slidable on a shaft, e.g. hammers for driving a valve		precedence)}
	or draw-off tube into a barrel	9/18	involving a piston-type slide valve
3/00	Hand chisels	9/20	involving a tubular-type slide valve
3/00	Hand chiseis	9/22	involving a rotary-type slide valve
5/00	Centre punches	9/24	involving a rocking-plate type valve
5/02	Automatic centre punches	9/26	Control devices for adjusting the stroke of the
7/00	Picks {(combined with other tools <u>B25F</u>)}		piston or the force or frequency of impact thereof {(control systems adapted for earth drilling
9/00	Portable percussive tools with fluid-pressure drive,		<u>E21B 44/00</u>)}
	{i.e. driven directly by fluids}, e.g. having several	9/265	• • • { with arrangements for automatic stopping
	percussive tool bits operated simultaneously		when the tool is lifted from the working face or
	{(portable non-percussive drilling tools driven by		suffers excessive bore resistance}

CPC - 2024.05

fluid pressure or pneumatic power <u>B23B 45/04</u>)}

11/00	Portable percussive tools with electromotor {or other motor} drive	17/11	• Arrangements of noise-damping means {(noise damping in general G10K 11/16)}
11/005	• {Arrangements for adjusting the stroke of the impulse member or for stopping the impact action	17/12	 of exhaust silencers {(exhaust silencers in general F01N)}
	when the tool is lifted from the working surface}	17/20	Devices for cleaning or cooling tool or work
11/02	• in which the tool is connected to an impulse	17/22	• using pressure fluid
	member	17/24	 Damping the reaction force {(resiliently mounted)
11/04	 in which the tool bit or anvil is hit by an impulse member 	17,21	handles <u>B25D 17/043</u> ; dampers in connections of hammers to backhoes <u>E02F 3/966</u>)}
11/06	Means for driving the impulse member	17/245	• • {using a fluid}
11/062	• • {comprising a wobbling mechanism, swash plate}	17/26	• Lubricating {(in general F16N)}
11/064	• • {using an electromagnetic drive}	17/265	• • {the lubricant being entrained to the machine
11/066	• • {using centrifugal or rotary impact elements}	17,200	parts by the driving fluid}
11/068	• • {in which the tool bit or anvil is hit by a rotary impulse member}	17/28	• Supports; Devices for holding power-driven percussive tools in working position {(connections
11/08	• comprising a worm mechanism {, i.e. a		of hammers to backhoes <u>E02F 3/966</u>)}
	continuous guide surface with steadily rising and	17/30	Pillars and struts
	falling incline}	17/32	Trolleys
11/10	comprising a cam mechanism		,
11/102	. • {the rotating axis of the cam member being coaxial with the axis of the tool}	2209/00	Details of portable percussive tools with fluid- pressure drive, i.e. driven directly by fluids,
11/104	• • • { with rollers or balls as cam surface }		e.g. having several percussive tool bits operated
11/104	{cam member and cam follower having		simultaneously
11/100	the same shape (B25D 11/104 takes	2209/002	Pressure accumulators
11/108	precedence)} • • {the rotation axis of the cam member being	2209/005	having a tubular-slide valve, which is coaxial with the piston
11/100	parallel but offset to the tool axis}	2209/007	• having a tubular-slide valve, which is not coaxial
11/12	comprising a crank mechanism	2203,007	with the piston
11/125	• • • {with a fluid cushion between the crank drive and the striking body}	2211/00	Details of portable percussive tools with electromotor or other motor drive
16/00	Portable percussive machines with superimposed	2211/003	Crossed drill and motor spindles
20,00	rotation {, the rotational movement of the output	2211/006	Parallel drill and motor spindles
	shaft of a motor being modified to generate axial	2211/06	. Means for driving the impulse member
	impacts on the tool bit (combined percussion and	2211/061	Swash-plate actuated impulse-driving
	rotary drilling adapted for earth drilling E21B 6/00)}		mechanisms
16/003	• {Clutches specially adapted therefor}	2211/062	Cam-actuated impulse-driving mechanisms
16/006	• {Mode changers; Mechanisms connected thereto}	2211/064	Axial cams, e.g. two camming surfaces coaxial
17/00	Details of, or accessories for, portable power-	2211/065	with drill spindle with ball-shaped or roll-shaped followers
	driven percussive tools {(details or components,		
	e.g. casings, bodies, of portable power-driven tools	2211/067	wherein the cams are involved in a progressive
	not particularly related to the operation performed B25F 5/00)}	2211/070	mutual engagement with increasing pressure of the tool to the working surface
17/005	• {Attachments or adapters placed between tool and	2211/068	Crank-actuated impulse-driving mechanisms
	hammer}	2216/00	Details of portable percussive machines with
17/02	• Percussive tool bits {(drill bits for earth drilling		superimposed rotation, the rotational movement
	<u>E21B 10/00</u>)}		of the output shaft of a motor being modified to
17/04	. Handles; Handle mountings	00121022	generate axial impacts on the tool bit
17/043	• • {Handles resiliently mounted relative to	2216/0007	Details of percussion or rotation modes
	the hammer housing (<u>B25D 17/046</u> takes	2216/0015	Tools having a percussion-only mode
	precedence)}	2216/0023	Tools having a percussion-and-rotation mode
17/046	• • {Sleeve-like handles surrounding the tool bit}	2216/003	comprising de-phasing of percussion and
17/06	• Hammer pistons; Anvils {; Guide-sleeves for		rotation
	pistons}	2216/0038	Tools having a rotation-only mode
17/08	• Means for retaining and guiding the tool bit, e.g.	2216/0046	Preventing rotation
	chucks {allowing axial oscillation of the tool bit	2216/0053	and percussion
	$(\underline{B25D} \ 17/005 \text{ takes precedence})$	2216/0061	preventing reverse rotation
17/082	• • {Retainers consisting of a swinging yoke or	2216/0069	Locking means
	latching means (<u>B25D 17/086</u> takes precedence)}	2216/0076	Angular position of the chisel modifiable by hand
17/084	• • {Rotating chucks or sockets}	2216/0084	Mode-changing mechanisms
17/086	• • { with a swinging yoke or latching means}		. Tool comprising two or more collaborating mode-
17/088	(with radial movable locking elements co- operating with bit shafts specially adapted therefor)		changing mechanisms
