CHEMISTRY

C02 TREATMENT OF WATER, WASTE WATER, SEWAGE, OR SLUDGE

C02F TREATMENT OF WATER, WASTE WATER, SEWAGE, OR SLUDGE (separation in general <u>B01D</u>; special arrangements on waterborne vessels of installations for treating water, waste water or sewage, e.g. for producing fresh water, <u>B63J</u>; adding materials to water to prevent

waste water or sewage, e.g. for producing fresh water, <u>B63J</u>; adding materials to water to prevent corrosion <u>C23F</u>; treating radioactively-contaminated liquids <u>G21F 9/04</u>; regeneration of reactants for recirculation into processes, see the relevant places for the processes)

NOTE

When classifying in this subclass, classification is also made in group $\underline{B01D\ 15/08}$ insofar as subject matter of general interest relating to chromatography is concerned.

WARNING

{In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.}

2101/00	Nature of the contaminant	2103/12	waters from cement or glass factories
2101/00	. {Explosive compounds, e.g. TNT}	2103/14	Paint wastes
2101/005	• {Radioactive compounds}	2103/16	• from metallurgical processes, i.e. from the
2101/000	Inorganic compounds		production, refining or treatment of metals, e.g.
2101/101	Sulfur compounds		galvanic wastes
2101/101	. {Arsenic compounds}	2103/18	from the purification of gaseous effluents
2101/105	• {Phosphorus compounds}	2103/20	from animal husbandry
2101/106	{Selenium compounds}	2103/22	• from the processing of animals, e.g. poultry, fish, or
2101/108	. {Boron compounds}		parts thereof
2101/100	Halogens or halogen-containing compounds	2103/24	• • from tanneries
2101/12	Fluorine or fluorine-containing compounds	2103/26	• from the processing of plants or parts thereof
2101/14	Nitrogen compounds, e.g. ammonia	2103/28	from the paper or cellulose industry
2101/163	{Nitrates}	2103/30	• from the textile industry
2101/166	{Nitrites}	2103/32	• from the food or foodstuff industry, e.g. brewery
2101/18	Cyanides		waste waters
2101/20	Heavy metals or heavy metal compounds	2103/322	• • {from vegetable oil production, e.g. olive oil
2101/203	{Iron or iron compound}		production}
2101/206	{Manganese or manganese compounds}	2103/325	• • {from processes relating to the production of
2101/22	Chromium or chromium compounds, e.g.	2102/227	wine products}
	chromates	2103/327	• • (from processes relating to the production of
2101/30	Organic compounds	2102/24	dairy products}
2101/301	• • {Detergents, surfactants}	2103/34	. from industrial activities not provided for in groups C02F 2103/12 - C02F 2103/32
2101/303	• • {Complexing agents}	2103/343	• {from the pharmaceutical industry, e.g.
2101/305	• • {Endocrine disruptive agents}	2103/343	containing antibiotics}
2101/306	• • {Pesticides}	2103/346	• • {from semiconductor processing, e.g. waste water
2101/308	• • {Dyes; Colorants; Fluorescent agents}	2103/340	from polishing of wafers}
			1

2102/26	from the manufacture of arganic commounds	2201/46195	Degrating the outhodic or and die food
2103/36 2103/365	from the manufacture of organic compounds{from petrochemical industry (e.g. refineries)}		Recycling the cathodic or anodic feed Supplying gas to the electrolyte (gas
2103/303	Polymers	2201/4019	diffusion electrodes <u>C02F 2001/46166</u>)
2103/38	For the manufacture or use of photosensitive	2201/46105	Cells containing solid electrolyte
2103/40	materials	2201/48	Devices for applying magnetic or electric fields
2103/42	from bathing facilities, e.g. swimming pools	2201/483	using coils
2103/44	from vehicle washing facilities	2201/486	. using antenna
2103/44	. Hom venicle washing facilities	2201/78	Details relating to ozone treatment devices
2201/00	Apparatus for treatment of water, waste water or	2201/782	Ozone generators
	sewage	2201/784	Diffusers or nozzles for ozonation
2201/001	Build in apparatus for autonomous on board water		
	supply and wastewater treatment (e.g. for aircrafts,	2203/00	Apparatus and plants for the biological treatment
	cruiseships, oil drilling platforms, railway trains,		of water, waste water or sewage
2201/002	space stations)	2203/002	comprising an initial buffer container
2201/002	Construction details of the apparatus	2203/004	comprising a selector reactor for promoting floc-
2201/003	Coaxial constructions, e.g. a cartridge located coaxially within another		forming or other bacteria
2201/004	Seals, connections	2203/006	details of construction, e.g. specially adapted seals,
2201/004	. Valves	2202/000	modules, connections
2201/005	Cartridges	2203/008	Mobile apparatus and plants, e.g. mounted on a vehicle
2201/007	Modular design		venicie
2201/007	Mobile apparatus and plants, e.g. mounted on a	2209/00	Controlling or monitoring parameters in water
2201/008	vehicle (for biological treatment C02F 2203/008)		treatment
2201/009	• Apparatus with independent power supply, e.g.	2209/001	• Upstream control, i.e. monitoring for predictive
2201/009	solar cells, windpower, fuel cells (for electrolysis		control
	apparatus <u>C02F 2201/46165</u>)	2209/003	• Downstream control, i.e. outlet monitoring, e.g.
2201/32	Details relating to UV-irradiation devices		to check the treating agents, such as halogens or
2201/322	Lamp arrangement	2200/007	ozone, leaving the process
2201/3221	Lamps suspended above a water surface or pipe	2209/005	Processes using a programmable logic controller
2201/3222	Units using UV-light emitting diodes [LED]	2200/006	[PLC]
2201/3223	Single elongated lamp located on the central	2209/006	comprising a software program or a logic diagram
	axis of a turbular reactor	2209/008	comprising telecommunication features, e.g. modems or antennas
2201/3224	Units using UV-light guiding optical fibers	2209/01	Density
2201/3225	Lamps immersed in an open channel,	2209/01	Temperature
	containing the liquid to be treated	2209/02	Pressure
2201/3226	Units using UV-light emitting lasers	2209/03	Oxidation reduction potential [ORP]
2201/3227	Units with two or more lamps	2209/04	Conductivity or salinity
2201/3228	• • Units having reflectors, e.g. coatings, baffles,	2209/055	Hardness
	plates, mirrors	2209/06	• pH
2201/324	Lamp cleaning installations, e.g. brushes	2209/07	Alkalinity
2201/326	Lamp control systems	2209/08	Chemical Oxygen Demand [COD]; Biological
2201/328	Having flow diverters (baffles)	2207/00	Oxygen Demand [BOD]
2201/46	Apparatus for electrochemical processes	2209/09	• Viscosity
