C12N MICROORGANISMS OR ENZYMES; COMPOSITIONS THEREOF; PROPAGATING, PRESERVING, OR MAINTAINING MICROORGANISMS; MUTATION OR GENETIC ENGINEERING; CULTURE MEDIA (microbiological testing media C12Q 1/00)

NOTES

- 1. Attention is drawn to Notes (1) to (3) following the title of class C12.
- 2. Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass A01P.
- 3. Therapeutic activity of single-cell proteins or enzymes is further classified in subclass A61P.
- 4. When classifying in this subclass, classification is also made in group <u>B01D 15/08</u> insofar as subject matter of general interest relating to chromatography is concerned.
- 5. In this subclass, it is desirable to add the indexing codes of subclass C12R.
- 6. {Documents relating to the use of vectors or hosts for the preparation of specific peptides, e.g. enzymes, are classified in subclass C07K or in group C12N 9/00 according to the peptides, with the appropriate indexing codes.}
- 7. {In this subclass, combination sets [C-Sets] are used. The detailed information about the C-Sets construction and the associated syntax rules is present in the definitions of C12N.}

WARNINGS

1. The following IPC groups are not in the CPC scheme. The subject matter for these IPC groups is classified in the following CPC groups:

Unicellular algae; Culture media therefor (as new plants A01H 13/00) 1/125 • • {Unicellular algae isolates} 1/14 • Fungi (culture of mushrooms A01G 18/00; as new plants A01H 15/00); Culture media therefor 1/145 • • {Fungal isolates} . . Yeasts; Culture media therefor 1/16 1/165 • • {Yeast isolates} 1/18 . . Baker's yeast; Brewer's yeast 1/185 . . . {Saccharomyces isolates} 1/20 . Bacteria; Culture media therefor 1/205 . . {Bacterial isolates} 1/22 . Processes using, or culture media containing, cellulose or hydrolysates thereof 1/24 . Processes using, or culture media containing, waste sulfite liquor Processes using, or culture media containing, 1/26 hydrocarbons (refining of hydrocarbon oils by using microorganisms C10G 32/00) 1/28 . . aliphatic 1/30 . . . having five or less carbon atoms . Processes using, or culture media containing, lower 1/32 alkanols, i.e. C₁ to C₆ 1/34 . Processes using foam culture 1/36 . Adaptation or attenuation of cells Chemical stimulation of growth or activity by 1/38 addition of chemical compounds which are not essential growth factors; Stimulation of growth by removal of a chemical compound (C12N 1/34 takes precedence) 3/00 Spore forming or isolating processes

5/00 Undifferentiated human, animal or plant cells, e.g. cell lines; Tissues; Cultivation or maintenance thereof; Culture media therefor; (plant reproduction by tissue culture techniques A01H 4/00)

NOTE

In this group, the following words are used with the meanings indicated:

• a "totipotent" cell can differentiate into all somatic lineages (ectoderm, mesoderm,

- endoderm), the germ line and extra-embryonic tissues such as the placenta;
- a "pluripotent" cell is a somatic stem cell which can differentiate into cells of at least two of the three somatic lineages (ectoderm, mesoderm, endoderm):
- a "multipotent" cell is restricted to one lineage;
- "progenitor" and "precursor" cells are further restricted within the lineage. If not explicitly forseen, totipotent cells are classified with pluripotent cells. Multipotent cells should not be classified with pluripotent cells. Unless provided for otherwise, committed progenitors are classified with their progeny.
- 5/0006 {Modification of the membrane of cells, e.g. cell decoration}
- 5/0012 {Cell encapsulation}
- 5/0018 {Culture media for cell or tissue culture (media for specific animal cell type $\underline{C12N}$ 5/06)}
- 5/0025 . . {Culture media for plant cell or plant tissue culture}
- 5/0031 . . {Serum-free culture media}

WARNING

This group is no longer used for the classification of new documents as from January 1, 2012. The backlog of this group is being continuously reclassified to C12N 5/0037 - C12N 5/0056

- 5/0037 • {Serum-free medium, which may still contain naturally-sourced components}
- 5/0043 • {Medium free of human- or animal-derived components}
- 5/005 • {Protein-free medium}
- 5/0056 • {Xeno-free medium}
- 5/0062 {General methods for three-dimensional culture}
- 5/0068 {General culture methods using substrates (for specific animal cell type C12N 5/06)}
- 5/0075 . . {using microcarriers}
- 5/0081 {Purging biological preparations of unwanted cells}
- 5/0087 . . {Purging against subsets of blood cells, e.g. purging alloreactive T cells}
- 5/0093 . . {Purging against cancer cells}
- 5/04 Plant cells or tissues {(culture media C12N 5/0025)}
- 5/06 {Animal cells or tissues; Human cells or tissues (preservation of living cells or tissues <u>A01N 1/02</u>)}

NOTE

{In this group, the following words are used with the meanings indicated:

- a "totipotent" cell can differentiate into all somatic lineages (ectoderm, mesoderm, endoderm), the germ line and extraembryonic tissues such as the placenta;
- a "pluripotent" cell is a somatic stem cell which can differentiate into cells of at least two of the three somatic lineages (ectoderm, mesoderm, endoderm);
- a "multipotent" cell is restricted to one lineage. }

"Progenitor" and "precursor" cells are further restricted within the lineage. If not explicitly forseen, totipotent cells are classified with

2310/127 DNAzymes 2310/3511
2310/128 . processing or releasing ribozyme 2310/13 . Decoys 2310/14 . interfering N.A. 2310/3517 . Lipophilic moiety, e.g. cholesterol 2310/14 . MicroRNAs, miRNAs 2310/3517 . Marker, Tag 2310/15 . Nucleic acids forming more than 2 strands, e.g. 2310/3519 . Fusion with another nucleic acid 2310/15 . Nucleic acids forming more than 2 strands, e.g. 2310/352 . linked to the nucleic acid via a carbon atom 2310/152 . on a single-stranded target, e.g. fold-back TFOs 2310/153 . with the aid of a protein, e.g. recombinase 2310/153 . with the aid of a protein, e.g. recombinase 2310/153 . with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . of the backbone 2310/31 . of the backbone 2310/31 . Phosphorates 2310/312 . Phosphonates 2310/313 . Phosphorotitioates 2310/313 . Phosphorodithioates 2310/314 . Phosphorodithioates 2310/315 . with an inverted bond, e.g. a cap structure 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 . Peptide nucleic acid, PNA 2310/318 . Peptide nucleic acid, PNA 2310/318 . Peptide nucleic acid, PNA 2310/318 . Pinked to the nucleic acid via an atom other than carbon (the than C12N 2310/16 or C12N 2310/17) 2310/352 . Nitrogen 2310/353 . Nitrogen 2310/353 . Nitrogen 2310/352 . branched 2310/353 . partially self-complementary or closed 2310/313 . Phosphorodithioates 2310/331 . Stem-loop; Hairpin 2310/313 . Phosphorodithioates 2310/314 . Phosphorodithioates 2310/315 . Phosphorodithioates 2310/316 . Phosphorodithioates 2310/318 . where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 . Phosphoroditioates 2310/318 . Phosphoroditioates 2310/319 . Inked to the nucleic acid, PNA 2310/319 . inked to the nucleic acid via an atom other than carbon 2310/310 . Interface the properties
2310/13 . Decoys 2310/14 . interfering N.A. 2310/141 . interfering N.A. 2310/15 . MicroRNAs, miRNAs 2310/15 . Nucleic acids forming more than 2 strands, e.g. 2310/3519 . Fusion with another nucleic acid 2310/15 . Nucleic acids forming more than 2 strands, e.g. 2310/352 . Iinked to the nucleic acid via a carbon atom TFOs 2310/151 . more than 3 strands, e.g. tetrads, H-DNA 2310/152 . on a single-stranded target, e.g. fold-back TFOs 2310/153 . with the aid of a protein, e.g. recombinase 2310/15 . with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/16 . Aptamers 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . of the backbone 2310/31 . of the backbone 2310/31 . Phosphortiesters 2310/31 . Phosphonates 2310/31 . Phosphonates 2310/312 . Phosphonates 2310/313 . Phosphorodithioates 2310/314 . Phosphorothioates 2310/315 . Phosphorothioates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 . Peptide nucleic acid, PNA 2310/318 . Pobli linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/14 . interfering N.A. 2310/141 MicroRNAs, miRNAs 2310/151 . Nucleic acids forming more than 2 strands, e.g. TFOs 2310/151 . more than 3 strands, e.g. tetrads, H-DNA 2310/152 . on a single-stranded target, e.g. fold-back TFOs 2310/352 . Allyl 2310/153 . with the aid of a protein, e.g. recombinase 2310/153 . with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/311 . Phosphorates 2310/312 . Phosphonates 2310/312 . Methyl 2310/325 MOE, methoxyethoxy 2310/352 Other alkyl chain 2310/352 Inteked to the nucleic acid via an atom other than carbon (other than C12N 2310/16 or C12N 2310/17) 2310/30 . Chemical structure 2310/31 . of the backbone 2310/31 . Phosphorates 2310/31 . Phosphonates 2310/31 . Phosphonates 2310/31 . Phosphonates 2310/31 . Phosphoramidates 2310/31 . Methylphosphonates 2310/352 Methylphosphonates 2310/353 Nitrogen 2310/313 . Phosphoramidates 2310/314 . Phosphoramidates 2310/315 . Phosphoratiotates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 . Peptide nucleic acid, PNA 2310/3183 . Diol linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/141 MicroRNAs, miRNAs 2310/15 . Nucleic acids forming more than 2 strands, e.g. TFOS TFOS 2310/352 linked to the nucleic acid via a carbon atom TFOS 2310/352 Methyl 2310/152 more than 3 strands, e.g. tetrads, H-DNA 2310/152 on a single-stranded target, e.g. fold-back TFOS 2310/153 with the aid of a protein, e.g. recombinase 2310/153 with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . of the backbone 2310/31 . Phosphoritisters 2310/31 . Phosphoroidithioates 2310/312 . Phosphoroidithioates 2310/313 . Phosphoroidithioates 2310/314 . Phosphoroidithioates 2310/315 . With the nitrogen in 3' or 5'-position 2310/318 . where the PO2 is completedy replaced, e.g. MMI or formacetal 2310/318 . Peptide nucleic acid, HPNA 2310/3183 . Diol linkers, e.g. glycols or propanediols 2310/319 . linked to the nucleic acid via a carbon atom 2310/352 Methyl 2310/352 MOE, methoxyethoxy 2310/352 linked to the nucleic acid via na drom other than carbon 2310/352 MOE, methoxyethoxy 2310/352 Iniked to the nucleic acid via na drom other than carbon 2310/352 Moethyl che nucleic acid via an atom other than carbon 2310/353 Halogen 2310/353 Nitrogen 2310/353 Nitrogen 2310/353 Nitrogen 2310/31 . Phosphoroidithioates 2310/52 . branched 2310/52 . branched 2310/53 . partially self-complementary or closed 2310/313 . Stem-loop; Hairpin 2310/314 . Phosphoroidithioates 2310/315 . Phosphoroidithioates 2310/316 . Phosphoroidithioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . where the PO2 is completely replaced, e.g. MMI or formacetal 2320/10 . in screening processes 2320/10 . in screening processes 2320/10 . in screening processes 2320/11 . in functional genomics, i.e. for the determination of gene function 2320/1
2310/141 . MicroRNAs, miRNAs 2310/152 . Nucleic acids forming more than 2 strands, e.g. 2310/352 . linked to the nucleic acid via a carbon atom TFOs 2310/352 . Methyl 2310/352 . Molty a carbon atom 2310/152 . on a single-stranded target, e.g. fold-back TFOs 2310/152 . on a single-stranded target, e.g. fold-back TFOs 2310/153 with the aid of a protein, e.g. recombinase 2310/352 . MOE, methoxyethoxy 2310/352 . Molty a carbon atom 2310/16 . Aptamers 2310/352 Molty a carbon atom 2
2310/15 . Nucleic acids forming more than 2 strands, e.g. TFOs 2310/151 more than 3 strands, e.g. tetrads, H-DNA 2310/3521 Methyl 2310/152 on a single-stranded target, e.g. fold-back TFOs 2310/153 with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . Of the backbone 2310/31 . Of the backbone 2310/312 . Phosphorates 2310/312 . Methylphosphonates 2310/313 . Phosphorodithicates 2310/314 . Phosphorodithicates 2310/315 . With the nitrogen in 3' or 5'-position 2310/317 . With an inverted bond, e.g. a cap structure 2310/318 . Where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 . Peptide nucleic acid, PNA 2310/318 . Diol linkers, e.g. glycols or propanediols 2310/319 . Linked to the nucleic acid via a carbon atom 2310/352 . Methyl 2310/3523 . Allyl 2310/3523 . MotP, methoxyethoxy 2310/353 . Hallogen 2310/3533 . Halogen 2310/353 . Nitrogen 2310/353 . Disphareir form, e.g. multimers, concatemers 2310/53 . Disphareir form, e.g. multimers, concatemers 2310/31 . Stem
TFOs TFOs TFOs TFOs TFOs TFOs TFOs TFOs
2310/151 more than 3 strands, e.g. tetrads, H-DNA 2310/152 on a single-stranded target, e.g. fold-back TFOs 2310/153 with the aid of a protein, e.g. recombinase 2310/153 with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . of the backbone 2310/31 . of the backbone 2310/311 . Phosphortiesters 2310/311 . Phosphortiesters 2310/312 . Phosphonates 2310/312 . Methylphosphonates 2310/313 . Methylphosphonates 2310/314 . Phosphorodithioates 2310/315 with the nitrogen in 3' or 5'-position 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . Phosphorothioates 2310/318 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/152 on a single-stranded target, e.g. fold-back TFOs 2310/153 with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/31 . of the backbone 2310/31 . of the backbone 2310/31 . of the backbone 2310/311 . Phosphotriesters 2310/312 Methylphosphonates 2310/313 . Phosphorodithioates 2310/313 . Phosphorodithioates 2310/314 . Phosphorodithioates 2310/315 with the nitrogen in 3' or 5'-position 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . Peptide nucleic acid, PNA 2310/3183 . Dioil linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/153 with the aid of a protein, e.g. recombinase 2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/311 . Phosphotriesters 2310/312 . Phosphotriesters 2310/312 . Methylphosphonates 2310/313 . Methylphosphonates 2310/314 . Phosphorodithioates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 . Phosphorothioates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . Peptide nucleic acid, PNA 2310/3183 . Diol linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/311 . Phosphotriesters 2310/312 . Phosphonates 2310/312 . Methylphosphonates 2310/313 . Phosphonates 2310/313 . Phosphoramidates 2310/314 . Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 . Phosphorothioates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . Peptide nucleic acid, PNA 2310/318 . Peptide nucleic acid, PNA 2310/319 . linked to the nucleic acid via an atom other than carbon than c
2310/16 . Aptamers 2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/311 Phosphotriesters 2310/312 Phosphotriesters 2310/312 Methylphosphonates 2310/313 Phosphoradithioates 2310/313 Phosphoradithioates 2310/314 Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 Peptide nucleic acid, PNA 2310/318 Peptide nucleic acid, PNA 2310/319 linked to the nucleic acid via an atom other than carbon (than ca
2310/17 . Immunomodulatory nucleic acids 2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/311 Phosphortiesters 2310/312 Phosphonates 2310/312 Phosphonates 2310/313 Methylphosphonates 2310/314 Phosphorodithioates 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 Peptide nucleic acid, PNA 2310/318 Peptide nucleic acid, PNA 2310/319 linked to the nucleic acid via an atom other than carbon 2310/353 linked to the nucleic acid via an atom other than carbon 2310/3531 Hydrogen 2310/3535 Halogen 2310/3535 Nitrogen 2310/355 Nitrogen 2310/52 branched 2310/52 branched 2310/53 partially self-complementary or closed 2310/531 Stem-loop; Hairpin 2310/532 Closed or circular 2310/533 having a mismatch or nick in at least one of the strands 2320/10 . in screening processes 2320/10 . in screening processes 2320/11 for the determination of target sites, i.e. of active nucleic acids 2320/12 . in functional genomics, i.e. for the determination of gene function 2320/13 . in a process of directed evolution, e.g. SELEX, acquiring a new function
2310/18 . acting by a non-sequence specific mechanism (other than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/311 . Phosphortiesters 2310/312 . Phosphonates 2310/312 . Methylphosphonates 2310/312 . Methylphosphonates 2310/313 . Phosphorodithioates 2310/314 . Phosphorodithioates 2310/315 . with the nitrogen in 3' or 5'-position 2310/315 . Phosphorothioates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/3181 . Peptide nucleic acid, PNA 2310/3183 . Diol linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
cother than C12N 2310/16 or C12N 2310/17) 2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/30 . Chemical structure 2310/31 . of the backbone 2310/312 . Phosphortiesters 2310/312 . Phosphonates 2310/313 . Methylphosphonates 2310/314 . Phosphorodithioates 2310/315 . With the nitrogen in 3' or 5'-position 2310/315 2310/316 . Phosphorothioates 2310/317 . With an inverted bond, e.g. a cap structure 2310/318 . Peptide nucleic acid, PNA 2310/318 2310/319 . Iinked by 2'-5' linkages, i.e. having a free 3'-
2310/20 . involving clustered regularly interspaced short palindromic repeats [CRISPRs] 2310/3533 Halogen 2310/3535 Nitrogen 2310/30 . Chemical structure 2310/31 of the backbone 2310/50 . Physical structure 2310/31 of the backbone 2310/51 in polymeric form, e.g. multimers, concatemers 2310/312 Phosphotriesters 2310/52 branched 2310/312 Phosphonates 2310/53 partially self-complementary or closed 2310/313 Phosphorodithioates 2310/331 Stem-loop; Hairpin 2310/313 Phosphoromidates 2310/332 Closed or circular 2310/314 Phosphoromidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 Phosphorothioates 2310/316 Phosphonothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 Peptide nucleic acid, PNA 2310/318 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-

2310/30 Chemical structure 2310/31 . of the backbone 2310/311 . Phosphotriesters 2310/312 . Phosphonates 2310/313 . Methylphosphonates 2310/313 . Phosphorodithioates 2310/314 . Phosphorodithioates 2310/315 . with the nitrogen in 3' or 5'-position 2310/315 . Phosphorothioates 2310/316 . Phosphorothioates 2310/317 . with an inverted bond, e.g. a cap structure 2310/318 . Peptide nucleic acid, PNA 2310/318 . Diol linkers, e.g. glycols or propanediols 2310/319 . linked by 2'-5' linkages, i.e. having a free 3'-
2310/311 of the backbone 2310/311 Phosphotriesters 2310/312 Phosphonates 2310/312 Methylphosphonates 2310/313 Methylphosphonates 2310/314 Phosphorodithioates 2310/315 With the nitrogen in 3' or 5'-position 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 Peptide nucleic acid, PNA 2310/318 Peptide nucleic acid, PNA 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/311 of the backbone 2310/311 Phosphotriesters 2310/312 Phosphonates 2310/312 Methylphosphonates 2310/313 Methylphosphonates 2310/314 Phosphorodithioates 2310/314 Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 Peptide nucleic acid, PNA 2310/318 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/311 Phosphotriesters 2310/312 Phosphonates 2310/312 Methylphosphonates 2310/313 Methylphosphonates 2310/313 Phosphorodithioates 2310/314 Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 Peptide nucleic acid, PNA 2310/318 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/312 Phosphonates 2310/312 Methylphosphonates 2310/313 Phosphorodithioates 2310/314 Phosphoramidates 2310/314 Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/318 Peptide nucleic acid, PNA 2310/3181 Peptide nucleic acid, PNA 2310/3182 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/3125 Methylphosphonates 2310/313 Phosphorodithioates 2310/314 Phosphoramidates 2310/314 Phosphoramidates 2310/315 with the nitrogen in 3' or 5'-position 2310/315 Phosphorothioates 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/313 Phosphorodithioates 2310/314 Phosphoramidates 2310/314 with the nitrogen in 3' or 5'-position 2310/315 with the nitrogen in 3' or 5'-position 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/314 Phosphoramidates 2310/314 with the nitrogen in 3' or 5'-position 2310/315 Phosphorothioates 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/314 Phosphoramidates 2310/314 with the nitrogen in 3' or 5'-position 2310/315 Phosphorothioates 2310/316 Phosphorothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/315 with the nitrogen in 3' or 5'-position 2310/315 Phosphorothioates 2310/316 Phosphonothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/315 Phosphorothioates 2310/316 Phosphonothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/316 Phosphonothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/316 Phosphonothioates 2310/317 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
2310/318 with an inverted bond, e.g. a cap structure 2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'- 2320/11 for the determination of target sites, i.e. of active nucleic acids 2320/12 in functional genomics, i.e. for the determination of gene function 2320/13 in a process of directed evolution, e.g. SELEX, acquiring a new function
2310/318 where the PO2 is completely replaced, e.g. MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'- 2320/11 Tor the determination of target sites, i.e. or active nucleic acids 2320/12 in functional genomics, i.e. for the determination of gene function 2320/13 in a process of directed evolution, e.g. SELEX, acquiring a new function
MMI or formacetal 2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'- 2320/12 in functional genomics, i.e. for the determination of gene function 2320/13 in a process of directed evolution, e.g. SELEX, acquiring a new function
2310/3181 Peptide nucleic acid, PNA 2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'- 2320/12 in functional genomics, i.e. for the determination of gene function 2320/12 in functional genomics, i.e. for the determination of gene function
2310/3183 Diol linkers, e.g. glycols or propanediols 2310/319 linked by 2'-5' linkages, i.e. having a free 3'- 2320/13 linked by 2'-5' linkages, i.e. having a free 3'-
2310/319 linked by 2'-5' linkages, i.e. having a free 3'-
acquiring a new function
position 2320/30 • Special therapeutic applications
2310/32 of the sugar 2320/31 Combination therapy
2210/221 21 O.P. Modification
2210/222 . Special derivery means, e.g. dissue-special
2320/33 . Alteration of spricing
2310/323 modified ring structure 2320/34 Allele or polymorphism specific uses
2310/3231 having an additional ring, e.g. LNA, ENA 2320/35 based on a specific dosage / administration
2310/3233 Morpholino-type ring regimen
2310/3235 having the O of the ribose replaced by 2320/50 . Methods for regulating/modulating their activity
2520/50 • Wednesd for regulating/modulating their activity
2320/31 modulating the chemical stability, e.g. nuclease-
2210/221
2310/331 Universal or degenerate base 2320/52 modulating the physical stability, e.g. GC-content
2310/332 Abasic residue 2320/53 reducing unwanted side-effects
2310/333 Modified A
2310/334 Modified C 2330/00 Production
2310/3341 5-Methylcytosine 2330/10 . naturally occurring
2310/335 Modified T or U 2330/30 . chemically synthesised
2220/21
2220/50 Discharged C
2310/337 in alpha-anomeric form 2330/50 . Biochemical production, i.e. in a transformed host
2310/34 • Spatial arrangement of the modifications cell
2310/341 Gapmers, i.e. of the type ====== 2330/51 Specially adapted vectors
2210/242
2310/343 having patterns, e.g. === 2500/02 . Atmosphere, e.g. low oxygen conditions
2310/344 Position-specific modifications, e.g. on every 2500/05 . Inorganic components
2310/344 • • Position-specific modifications, e.g. on every purine, at the 3'-end 2500/05 • Inorganic components

2500/10	M. 1. M. 1. 1. 1		4 4 4 4 10 47 11 11 44
2500/10	. Metals; Metal chelators (cobalamine		receptor, the receptor itself, antibodies against the
2500/12	<u>C12N 2500/38</u>)		receptor or inhibitors of the conversion enzyme which processes the protein precursor. Unless
2500/12	Light metals, i.e. alkali, alkaline earth, Be, Al,		otherwise provided for, ligands and substrates take
2500/14	Mg		precedence over receptors and enzymes.
2500/14	Calcium; Ca chelators; Calcitonin		precedence over receptors and enzymes.
2500/16	Magnesium; Mg chelators	2501/01	• Modulators of cAMP or cGMP, e.g. non-
2500/20	Transition metals		hydrolysable analogs, phosphodiesterase inhibitors,

2506/098	• • from cells of secretory glands, e.g. parotid gland,	2523/00	Culture process characterised by temperature
2300/070	salivary glands, sweat glands, lacrymal glands		
2506/11	from blood or immune system cells	2525/00	Culture process characterised by gravity, e.g.
2506/115	from monocytes, from macrophages		microgravity
2506/13	from connective tissue cells, from mesenchymal cells	2527/00	Culture process characterised by the use of mechanical forces, e.g. strain, vibration
2506/1307	• • from adult fibroblasts	2529/00	Culture process characterised by the use of
2506/1315	• • from cardiomyocytes	2327/00	electromagnetic stimulation
2506/1323	from skeletal muscle cells	2529/10	Stimulation by light
2506/133	from tenocytes		•
2506/1338	from smooth muscle cells	2531/00	Microcarriers
2506/1346	from mesenchymal stem cells	2533/00	Supports or coatings for cell culture, characterised
2506/1353	from bone marrow mesenchymal stem cells		by material
2506/1261	(BM-MSC)	2533/10	Mineral substrates
2506/1361	from dental pulp or dental follicle stem cellsfrom blood-borne mesenchymal stem cells, e.g.	2533/12	Glass
2506/1369	MSC from umbilical blood	2533/14	Ceramic
2506/1376	from mesenchymal stem cells derived from hair	2533/18	• Calcium salts, e.g. apatite, Mineral components
2300/1370	follicles		from bones, teeth, shells
2506/1384	• • • from adipose-derived stem cells [ADSC], from	2533/20	Small organic molecules
2500/1504	adipose stromal stem cells	2533/30	• Synthetic polymers (thermoreactive polymers, e.g.
2506/1392	from mesenchymal stem cells from other		PNIPAm, <u>C12N 2539/10</u>)
	natural sources	2533/32	• Polylysine, polyornithine
2506/14	• from hepatocytes	2533/40	• Polyhydroxyacids, e.g. polymers of glycolic or
2506/22	from pancreatic cells		lactic acid (PGA, PLA, PLGA); Bioresorbable
2506/23	from cells of the gastro-intestinal tract	2522/50	polymers
2506/24	from cells of the genital tract, from non-germinal	2533/50	• Proteins
	gonad cells	2533/52	Fibronectin; Laminin
2506/243	from cells of the female genital tract cells, from	2533/54	Collagen; Gelatin
	non-germinal ovarian cells	2533/56	• Fibrin; Thrombin
2506/246	from cells of the male genital tract cells, from	2533/70	• Polysaccharides
	non-germinal testis cells	2533/72	• Chitin, chitosan
2506/25	from renal cells, from cells of the urinary tract	2533/74	• Alginate
2506/27	• from lung cells, from cells of the respiratory tract	2533/76	. Agarose, agar-agar
2506/28	from vascular endothelial cells	2533/78 2533/80	Cellulose Hyaluronan
2506/30	• from cancer cells, e.g. reversion of tumour cells	2533/90	Substrates of biological origin, e.g. extracellular
	<u>NOTE</u>	2333/90	matrix, decellularised tissue
	Unless the tumourigenic phenotype is totally	2533/92	Amnion; Decellularised dermis or mucosa
	reversed, the end product is still classified under		
	<u>C12N 5/0693</u> .	2535/00	Supports or coatings for cell culture characterised by topography
2506/45	from artificially induced pluripotent stem cells	2535/10	• Patterned coating
2300/43	. Hom artificially induced prumpotent stem cens		· Tatterned coating
2509/00	Methods for the dissociation of cells, e.g. specific	2537/00	Supports and/or coatings for cell culture
2500/10	use of enzymes	2525/10	characterised by physical or chemical treatment
2509/10	Mechanical dissociation	2537/10	. Cross-linking
2510/00	Genetically modified cells	2539/00	Supports and/or coatings for cell culture
2510/02	Cells for production		characterised by properties
2510/04	. Immortalised cells	2539/10	• Coating allowing for selective detachment of cells, e.g. thermoreactive coating
2511/00	Cells for large scale production	T 7*	
2513/00	3D culture	<u>Viruses</u>	
2517/00	Cells related to new breeds of animals	2710/00	dsDNA viruses
2517/02	Cells from transgenic animals	2710/00011	
2517/04	Cells produced using nuclear transfer	2710/00021	• Viruses as such, e.g. new isolates, mutants or
2517/10	Conditioning of cells for <u>in vitro</u> fecondation or	2710/00022	their genomic sequences
	nuclear transfer	2/10/00022	New viral proteins or individual genes, new structural or functional aspects of known viral
2521/00	Culture process characterised by the use of		proteins or genes
	hydrostatic pressure, flow or shear forces		. Virus like particles [VLP]
2521/10	. Sound, e.g. ultrasounds	2710/00031	Uses of virus other than therapeutic or vaccine, disinfectant
			e.g. disinfectant

2710/00032 Use of virus as therapeutic agent, other than	2710/10071 Demonstrated in vivo effect
vaccine, e.g. as cytolytic agent	2710/10088 for redistribution
2710/00033 Use of viral protein as therapeutic agent other	2710/10111 Atadenovirus, e.g. ovine adenovirus D
than vaccine, e.g. apoptosis inducing or anti-	2710/10121 Viruses as such, e.g. new isolates, mutants or
inflammatory	their genomic sequences
2710/00034 Use of virus or viral component as vaccine, e.g.	2710/10122 New viral proteins or individual genes, new
live-attenuated or inactivated virus, VLP, viral	structural or functional aspects of known
protein	viral proteins or genes
2710/00041 Use of virus, viral particle or viral elements as a	2710/10123 Virus like particles [VLP]
vector	2710/10131 Uses of virus other than therapeutic or
2710/00042 virus or viral particle as vehicle, e.g.	vaccine, e.g. disinfectant
encapsulating small organic molecule	2710/10132 Use of virus as therapeutic agent, other than
2710/00043 viral genome or elements thereof as genetic	vaccine, e.g. as cytolytic agent
vector	2710/10133 Use of viral protein as therapeutic agent
2710/00044 Chimeric viral vector comprising heterologous	other than vaccine, e.g. apoptosis inducing or
viral elements for production of another viral	anti-inflammatory
vector	2710/10134 Use of virus or viral component as vaccine,
2710/00045 Special targeting system for viral vectors	e.g. live-attenuated or inactivated virus, VLP,
2710/00051 Methods of production or purification of viral	viral protein
material	2710/10141 Use of virus, viral particle or viral elements
2710/00052 relating to complementing cells and packaging	as a vector
systems for producing virus or viral particles	2710/10142 virus or viral particle as vehicle, e.g.
2710/00061 Methods of inactivation or attenuation	encapsulating small organic molecule
2710/00062 by genetic engineering	2710/10143 viral genome or elements thereof as
2710/00063 by chemical treatment	genetic vector
2710/00064 by serial passage	2710/10144 Chimeric viral vector comprising
2710/00071 . Demonstrated in vivo effect	heterologous viral elements for production
2710/00088 for redistribution	of another viral vector
2710/10011 • Adenoviridae	2710/10145 Special targeting system for viral vectors
2710/10011 • Adenovindae 2710/10021 • Viruses as such, e.g. new isolates, mutants or	2710/10151 Methods of production or purification of
their genomic sequences	viral material
2710/10022 New viral proteins or individual genes, new	2710/10152 relating to complementing cells and
structural or functional aspects of known viral	packaging systems for producing virus or
proteins or genes	viral particles
2710/10023 Virus like particles [VLP]	2710/10161 Methods of inactivation or attenuation
2710/10023 Vitus like particles [VEF] 2710/10031 Uses of virus other than therapeutic or vaccine,	2710/10162 by genetic engineering
e.g. disinfectant	2710/10163 by chemical treatment
2710/10032 • • • Use of virus as therapeutic agent, other than	2710/10164 by serial passage
vaccine, e.g. as cytolytic agent	2710/10171 Demonstrated <u>in vivo</u> effect
2710/10033 • • • Use of viral protein as therapeutic agent other	2710/10188 for redistribution
than vaccine, e.g. apoptosis inducing or anti-	2710/10211 Aviadenovirus, e.g. fowl adenovirus A
inflammatory	
2710/10034 Use of virus or viral component as vaccine, e.g.	2710/10221 Viruses as such, e.g. new isolates, mutants or their genomic sequences
live-attenuated or inactivated virus, VLP, viral	2710/10222 New viral proteins or individual genes, new
protein	structural or functional aspects of known
2710/10041 Use of virus, viral particle or viral elements as	viral proteins or genes
a vector	2710/10223 Virus like particles [VLP]
2710/10042 virus or viral particle as vehicle, e.g.	2710/10233 Vitus like particles [VLI] 2710/10231 Uses of virus other than therapeutic or
encapsulating small organic molecule	vaccine, e.g. disinfectant
2710/10043 viral genome or elements thereof as genetic	2710/10232 Use of virus as therapeutic agent, other than
vector	vaccine, e.g. as cytolytic agent
2710/10044 Chimeric viral vector comprising	2710/10233 Use of viral protein as therapeutic agent
heterologous viral elements for production of	other than vaccine, e.g. apoptosis inducing or
another viral vector	anti-inflammatory
2710/10045 Special targeting system for viral vectors	2710/10234 Use of virus or viral component as vaccine,
2710/10051 Methods of production or purification of viral	e.g. live-attenuated or inactivated virus, VLP,
material	viral protein
2710/10052 relating to complementing cells and	2710/10241 Use of virus, viral particle or viral elements
packaging systems for producing virus or	as a vector
viral particles	2710/10242 virus or viral particle as vehicle, e.g.
2710/10061 Methods of inactivation or attenuation	encapsulating small organic molecule
2710/10062 by genetic engineering	2710/10243 viral genome or elements thereof as
2710/10063 by chemical treatment	genetic vector
2710/10064 by serial passage	8

2710/10244 Chimeric viral vector comprising heterologous viral elements for production	2710/12032 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
of another viral vector	2710/12033 Use of viral protein as therapeutic agent other
2710/10245 Special targeting system for viral vectors	than vaccine, e.g. apoptosis inducing or anti-
2710/10251 Methods of production or purification of	inflammatory
viral material	2710/12034 Use of virus or viral component as vaccine, e.g.
2710/10252 relating to complementing cells and	live-attenuated or inactivated virus, VLP, viral
packaging systems for producing virus or	protein
viral particles	2710/12041 Use of virus, viral particle or viral elements as
2710/10261 Methods of inactivation or attenuation	a vector
2710/10262 by genetic engineering	2710/12042 virus or viral particle as vehicle, e.g.
2710/10263 by chemical treatment	encapsulating small organic molecule
2710/10264 by serial passage	2710/12043 viral genome or elements thereof as genetic
2710/10271 Demonstrated <u>in vivo</u> effect	vector
2710/10288 for redistribution	2710/12044 Chimeric viral vector comprising
2710/10311 Mastadenovirus, e.g. human or simian	heterologous viral elements for production of
adenoviruses	another viral vector
2710/10321 Viruses as such, e.g. new isolates, mutants or	2710/12045 Special targeting system for viral vectors
their genomic sequences	2710/12051 Methods of production or purification of viral
2710/10322 New viral proteins or individual genes, new	material
structural or functional aspects of known	2710/12052 relating to complementing cells and
viral proteins or genes	packaging systems for producing virus or
2710/10323 Virus like particles [VLP]	viral particles
2710/10331 Uses of virus other than therapeutic or	2710/12061 Methods of inactivation or attenuation
vaccine, e.g. disinfectant	2710/12062 by genetic engineering
2710/10332 Use of virus as therapeutic agent, other than	2710/12063 by chemical treatment
vaccine, e.g. as cytolytic agent	2710/12064 by serial passage
2710/10333 Use of viral protein as therapeutic agent	2710/12071 Demonstrated <u>in vivo</u> effect
other than vaccine, e.g. apoptosis inducing or	2710/12088 for redistribution
anti-inflammatory	2710/14011 Baculoviridae

Virus like particles [VI.P] 2710/16631 . Uses of virus of the matherapeutic or vaccine, e.g. disinfectant vaccine, e.g. as cytolytic agent 2710/16632 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2710/16633 . Use of virus or wiral component as vaccine, e.g. live-attenuated or inactivated virus, VI.P, viral protein as a vector e.g. live-attenuated or inactivated virus, VI.P, viral protein as a vector 2710/16641 . Use of virus, viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16642 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 . viral genome or elements thereof as genetic vector 2710/16645 . Special targeting systems for production of another viral vector comprising heterologous viral elements for production of viral material 2710/16651 . Methods of production or purification of viral material 2710/16662 . by genetic engineering 2710/16651 . Poemostrated in vivo effect 2710/16663 . by chemical treatment 2710/16664 . by serial passage 2710/18032 . Uses of viras or individual genes, new structural or functional aspects of known viral proteins or genes 2710/18034 . Use of virus or viral component as vaccine, e.g. disnifection of viral material 2710/16664 . by serial passage 2710/18042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16651 . Poemostrated in vivo effect 2710/16661 . Demonstrated in vivo effect 2710/16662 . by genetic engineering 2710/16663 . by chemical treatment 2710/16664 . by serial passage 2710/16671 . Demonstrated in vivo effect 2710/16688 . for redistribution 2710/16671 . Demonstrated in vivo effect 2710/16681 . Virus as as such, e.g. new isolates, mutants or their genomic sequences 2710/18042 . virus or		of another viral vector
their genomic sequences New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2710/16623 New viral proteins or genes 2710/16631 Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2710/16632 Use of virus other than therapeutic or vaccine, e.g. disinfectant 2710/16632 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2710/16633 Use of virus or trial eagent other than vaccine, e.g. as cytolytic agent 2710/16634 Use of virus or viral component as vaccine, e.g. investmented or inactivated virus, VLP, viral protein 2710/16641 Use of virus or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 virul genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector viral particles 2710/16651 Methods of production or purification of viral defined packaging systems for production or purification of another viral vector viral particle as vehicle, e.g. 2710/16652 Pecial targeting system for viral vectors 2710/16663 Pecial production or purification of viral particle as vehicle, e.g. 2710/16664 Department of the production of another viral vector viral particles 2710/16651 Methods of production or purification of viral particle as vehicle, e.g. 2710/16662 Pecial production or purification of viral particle as vehicle or viral particles 2710/16652 Pecial targeting system for viral vector viral particles 2710/16663 Pecial production or purification of viral protein or individual genes, new viral particle or viral elements as a vector 2710/16652 Pecial targeting systems for production or purification of viral protein or purification of viral protein or individual genes, new v		2710/16745 Special targeting system for viral vectors
2710/16622 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2710/16631 Virus like particles [VLP] 2710/16631 Use of virus of the than therapeutic or vaccine, e.g. disinfectant 2710/16632 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16634 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein Use of virus or viral particle or viral elements as a vector 2710/16641 Use of virus or viral particle or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16642 virus or viral vector comprising heterologous viral elements for production of another viral vector 2710/16652 Popticinal vector 2710/16652 Popticinal vector 2710/16652 Popticinal vector 2710/16653 Popticinal vector 2710/16654 Popticinal vector 2710/16655 Popticinal vector 2710/16655 Popticinal vector 2710/16656 Popticinal vector 2710/16652 Popticinal vector 2710/16653 Popticinal vector 2710/16654 Popticinal vector 2710/16655 Popticinal vector 2710/16655 Popticinal vector 2710/16655 Popticinal vector 2710/16655 Popticinal vector 2710/16665		2710/16751 Methods of production or purification of
structural or functional aspects of known viral proteins or genes 2710/16623 . Virus like particles VLP 2710/16631 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2710/16632 . Use of virus as therapeutic agent, other than vaccine, e.g. asportosis inducing or anti-inflammatory 2710/16633 . Use of virus protein as therapeutic agent other than vaccine, e.g. as eytolytic agent 2710/16634 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16642 . Virus or viral particle or viral elements as a vector 2710/16643 . viral genome or elements thereof as genetic vector 2710/16644 . Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16645 . Special targeting systems for production of viral material 2710/16665 . Methods of production or purification of viral particle or viral elements or viral particle or viral elements or viral particle or viral elements or production of another viral vector comprising heterologous viral elements for production of another viral vector or comprising heterologous viral elements for production or viral particle or viral particle as velicle, e.g. 2710/18032 . Virus like particles VIIP 2710/16644 . Chimeric viral vector comprising heterologous viral elements for production or viral particle or viral particle as velicle, e.g. 2710/18032 . Virus like particles VIIP 2710/16651 . Methods of production or purification of viral material 2710/16662 . by senic engineering 2710/16663 . by chemical treatment 2710/16664 . by serial passage 2710/16665 . by genetic engineering 2710/16665 . by senic engineering 2710/16666 . by serial passage 2710/16661 . Methods of inactivation or attenuation 2710/16662 . by genetic engineering 2710/16663 . by chemical treatment 2710/16664 . by serial passage 2710/16665 . by enable device or o		
2710/16623 Virus like particles [VLP] 2710/16631 Uses of virus other than therapeutic or vaccine, e.g. disnifectant 2710/16632 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2710/16633 Use of virus or viral component as vaccine, e.g. as opposes inducing or anti-inflammatory 2710/16634 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641 Use of virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 virus or viral cements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16652 Special targeting system for viral vectors 2710/16653 Methods of production or purification of viral material 2710/16654 by senial passage 2710/16665 Methods of inactivation or attenuation 2710/16665 Py chemical treatment 2710/16664 by serial passage 2710/16665 Py chemical treatment 2710/16664 by serial passage 2710/16665 Venice engineering 2710/16674 by serial passage 2710/16688 for redistribution 2710/16698 for redistribution 2710/16698 for redistribution or their genomic sequences 2710/16691 Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16671 Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 Virus as as uch e.g. hew isolates, mutants or their genomic sequences 2710/16722 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genetic vector 2710/16681 Methods of inactivated virus, VLP, viral proteins or distribution or viral particle as vehicle, e.g. e.g. displayed the protein or distribution or viral particle as vehicle, e.g. encapsulating small organic molecule virus vector comprising heterologous viral elements for production of another viral vector comprising heterologous viral elements for production of another vira		
2710/16631 Uses of virus other than therapeutic or vaccine, e.g., disinfectant vaccine, e.g., disvigation of the than vaccine, e.g., apoptosis inducing or anti-inflammatory viral protein viral period as a vector viral protein viral particle as vehicle, e.g. encapsulating small organic molecule viral vector viral vector comprising heterologous viral elements for production of another viral vector	viral proteins or genes	
vaccine, e.g. disinfectant vaccine, e.g. disinfectant vaccine, e.g. disinfectant vaccine, e.g. actylotric agent viral protein as therapeutic or viral proteins or individual genes, new varial proteins or individual genes, new vaccine, e.g. actylotric agent vaccine, e.g. actylotric actylotric agent vaccine, e.g. actylotric actylotric vaccine, e.g. actylotric actylotric vaccine, e.g. actylotric actylotric		
2710/16632		
vaccine, e.g. as cytolytic agent 2710/16633 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16634 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641 . Use of virus, viral particle or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16651 . Methods of production or purification of viral material 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 . by serial passage 2710/18032 . Virus as such, e.g. new isolates, mutants or their genomic sequences 2710/18032 . Virus like particles [VLP] 2710/18033 . Uses of virus other than therapeutic or vaccine, e.g. disnifectant vaccine, e.g. as cytolytic agent vaccine, e.g. as cytolytic agent vaccine, e.g. as cytolytic agent vaccine, e.g. apoptosis inducing or anti- inflammatory 2710/18034 . Use of virus as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti- inflammatory 2710/18034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/18034 . Use of virus, viral particle or viral elements as a vector 2710/18045 by genetic engineering 2710/18046 by genetic engineering 2710/18048 virus or viral particle or viral elements as a vector 2710/18049 virus or viral particle or viral elements as a vector 2710/18040 virus or viral particle or viral elements as a vector 2710/18041 . Use of virus, viral particle or viral elements as a vector 2710/18042 virus or viral particle or viral elements as a vector 2710/18043 viral genome or elements thereof as genetic vector 2710/18045 by genetic engineering 2710/18048 or lating to complement as vaccine, e.g. 271	_	
2710/16633 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16634 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein as a vaccior as a vector 2710/16641		-
other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16634 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641 Use of virus, viral particle or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector or viral material 2710/16651 Methods of production or viral particles 2710/16662 virus or production or viral particle or viral vectors 2710/16664 by serial passage 2710/16664 by serial passage 2710/16665 by senical treatment 2710/16664 by serial passage 2710/16665 virus as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16662 by senical treatment 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16665 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16664 by serial passage 2710/16665 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16661 virus or viral vectors 2710/16652 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16665 virus or viral component as vaccine, e.g. apoptosis inducing or viral particle or viral vectors 2710/1668 of redistribution 2710/1669 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/1669 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16651 virus of production or purification of viral vectors 2710/16652 virus or viral component as vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/16664 virus or vi		
anti-inflammatory 2710/16634 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641 . Use of virus, viral particle or viral elements as a vector 2710/16642 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 . viral genome or elements thereof as genetic vector 2710/16644 . Chimeric viral vector comprising heterologous viral elements for production of another viral vector viral particle material 2710/16652 . Special targeting system for viral vectors 2710/16663 . Methods of production or viral particles and packaging systems for producin or viral particle complements as a vector 2710/16661 . Methods of inactivation or attenuation 2710/16662 . by genetic engineering 2710/16663 . by chemical treatment 2710/16664 . Demonstrated in vivo effect 2710/16671 . Demonstrated in vivo effect 2710/16711 . Viruses as such, e.g. new isolates, mutants or their genomic sequences as uch, e.g. virus solates, mutants or their genomic sequences as uch, e.g. virus or viral perteins or individual genes, new structural or functional aspects of known viral proteins or individual genes, new structural or functional aspects of known viral proteins or individual genes, new structural or viral particle as vehicle, e.g. 2710/18032 . Virus like particles [VLP] 2710/18032 . Use of virus or than therapeutic agent other than vaccine, e.g. as cytolytic agent 2710/18033 . Use of virus protein as therapeutic agent other than vaccine, e.g. as poptosis inducing or anti-inflammatory 2710/18043 . Use of virus or viral particle as vehicle, e.g. 1/20/18044 . Use of virus or viral particle or viral elements as a vector 2710/18051 . Virus or viral particle or viral elements as a vector or viral particle or viral elements as a vector or viral vector or viral elements or viral particle as vehicle, e.g. 2/20/18044 . Virus or viral particle as vehicle, e.g. 2/20/18045 . Virus or viral particle as vehicle, e.g. 2/20/18045 . Virus or viral particle as vehicle,		
e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/16641		2710/18011 Nimaviridae
viral protein 2710/16641 . Use of virus, viral particle or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16651 Special targeting system for viral vectors 2710/16652 relating to complementing cells and packaging systems for production or viral particles 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 Methods of inactivation or attenuation 2710/16665 by serial passage 2710/16666 by serial passage 2710/16661 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 Demonstrated in vivo effect 2710/16671 Demonstrated in vivo effect 2710/16671 Demonstrated in vivo effect 2710/16671 Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 New viral proteins or individual genes, new structural or functional aspects of known viral proteins are individual genes, new structural or functional aspects of known viral particles as venicle regens individual genes, new structural or functional aspects of known viral proteins are individual genes, new structural or functional aspects of known viral proteins as a vector 2710/16722 Viruse as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 Viruse as such, e.g. new isolates, mutants or their genomic sequences 2710/16722	2710/16634 Use of virus or viral component as vaccine,	2710/18021 Viruses as such, e.g. new isolates, mutants or
2710/16641 Use of virus, viral particle or viral elements as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16655 Special targeting system for viral vectors 2710/16651 Methods of production or viral particles 2710/16652 relating to complementing cells and packaging systems for producing viral particles 2710/16664 Methods of inactivation or attenuation 2710/16664 by genetic engineering 2710/16664 by sernial passage 2710/16664 by sernial passage 2710/16661 . Demonstrated in vivo effect 2710/16671 . Demonstrated in vivo effect 2710/16711 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16722 . New viral proteins or individual genes, new structural or functional aspects of known viral particles as threat proteins or genes 2710/18032 Virus like particles [VLP] 2710/18033 Uses of virus as therapeutic agent, other than vaccine, e.g. disinfectant vaccine, e.g. disinfectant vaccine, e.g. as cytolytic agent than vaccine, e.g. as cytolytic agent vaccine, e.g. as cytolytic agent than vaccine, e.g. as cytolytic agent vaccine,		
as a vector 2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16645 Special targeting system for viral vectors 2710/16651 . Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16663 by genetic engineering 2710/16664 by serial passage 2710/16664 by serial passage 2710/16671 . Demonstrated in vivo effect 2710/16671 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16722 . New viral proteins or individual genes, new structural or functional aspects of known 2710/18052 Virus sike particles [VLP] 2710/18031 Uses of virus other than therapeutic agent, other than vaccine, e.g. e.g. disinfectant 2710/18032 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 12710/18043 Use of virus protein as therapeutic agent other than vaccine, e.g. as cytolytic agent 12710/18045 Special targeting system for production of another viral vector or viral particle as the rapeutic agent other than vaccine, e.g. as cytolytic agent 12710/18045		
2710/16642 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16645 Special targeting system for viral vectors 2710/16651 . Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16664 by genetic engineering 2710/16665 by chemical treatment 2710/16664 by serial passage 2710/16665 by chemical treatment 2710/16668 for redistribution 2710/16671 . Demonstrated in vivo effect 2710/16671 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 . New viral proteins or individual genes, new structural or functional aspects of known 2710/16722 . New viral proteins or individual genes, new structural or functional aspects of known 2710/16722 virus or viral particle as vehicle, e.g. encapsulating systems for production or purification of viral material 2710/18042 virus or viral particle are viral elements as a vector 2710/18043 virus or viral particle or viral elements as a vector 2710/18044 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18043 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18045 Special targeting system for viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 Special targeting system for viral elements for production of particles or inflowed and packaging systems for production or purification of viral material 2710/18052 relating to complementing cells and packaging systems for production virus or viral packaging systems for production virus or viral protein as therapeutic agent other than vaccine, e.g. day virus or viral protein as therapeutic agent other than		
encapsulating small organic molecule 2710/16643 viral genome or elements thereof as genetic vector 2710/16644 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/16645 Special targeting system for viral vectors 2710/16651 Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16663 by genetic engineering 2710/16664 by serial passage 2710/16665 Demonstrated in vivo effect 2710/16688 for redistribution 2710/16711 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16722 New viral proteins or individual genes, new structural or functional aspects of known 2710/18032 Use of virus other than therapeutic or vaccine, e.g. disinfectant 2710/18032 Use of virus as therapeutic agent, other than vaccine, e.g. disinfectant 2710/18033 Use of virus or virus protein as therapeutic agent, other than vaccine, e.g. disinfectant 2710/18033 Use of virus or viral protein as therapeutic agent other than vaccine, e.g. as cytolytic agent 18210/18033 Use of virus or viral protein as therapeutic agent other than vaccine, e.g. as cytolytic agent 18210/18033 Use of virus or viral protein as therapeutic agent other than vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18034 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. as cytolytic agent 18210/18033 . Use of virus or viral component as vaccine, e.g. asocytolytic agent 18210/18034 . Use of virus or viral component as vaccine, e.g. as

heterologous viral elements for production of another viral vector 2710/16645 Special targeting system for viral vectors 2710/16651 Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16662 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16665 Demonstrated in vivo effect 2710/16671 Demonstrated in vivo effect 2710/16671 Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 New viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/18034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/18041 . Use of virus, viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18043 . viral genome or elements thereof as genetic vector 2710/18044 . Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 . Special targeting system for viral vectors 2710/18046 . Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18051 . Methods of production or purification of viral material 2710/18052 . relating to complementing cells and packaging systems for producing virus or		-
of another viral vector 2710/16645 Special targeting system for viral vectors 2710/16651 Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16661 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16665 Demonstrated in vivo effect 2710/16688 for redistribution 2710/16721 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16722 . New viral proteins or individual genes, new structural or functional aspects of known than vaccine, e.g. apoptosis inducing or anti-inflammatory 2710/18034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/18041 . Use of virus, viral particle or viral elements as a vector 2710/18042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18043 . viral genome or elements thereof as genetic vector 2710/18044 . Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 . Special targeting system for viral vectors 2710/18045 . Poetin protein or viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 . Special targeting system for viral vectors 2710/18051 . Methods of production or purification of viral material 2710/18052 . relating to complementing cells and packaging systems for producing virus or		
2710/16645 Special targeting system for viral vectors 2710/16651 Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16661 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16668 by serial passage 2710/16688 for redistribution 2710/16711 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 . New viral proteins or individual genes, new structural or functional aspects of known 2710/18042 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2710/18041 Use of virus, viral particle or viral elements as a vector 2710/18042 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18043 viral genome or elements thereof as genetic vector 2710/18044 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 Special targeting system for viral vectors 2710/18051 . Methods of production or purification of viral material 2710/18052 relating to complementing cells and packaging systems for producing virus or		, , ,
2710/16651 Methods of production or purification of viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16661 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/166671 Demonstrated in vivo effect 2710/16688 for redistribution 2710/16711 . Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 New viral proteins or individual genes, new structural or functional aspects of known 2710/18052 Use of virus or viral particle or viral elements as a vector 2710/18042 Use of virus, viral particle or viral elements as a vector 2710/18042 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18043 viral genome or elements thereof as genetic vector 2710/18044 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 Special targeting system for viral vectors 2710/18051 Methods of production or purification of viral material 2710/18052 relating to complementing cells and protein protein		
viral material 2710/16652 relating to complementing cells and packaging systems for producing virus or viral particles 2710/16661 Methods of inactivation or attenuation 2710/16662 by genetic engineering 2710/16663 by chemical treatment 2710/16664 by serial passage 2710/16671 Demonstrated in vivo effect 2710/16688 for redistribution 2710/16711 Varicellovirus, e.g. human herpesvirus 3, Varicella Zoster, pseudorabies 2710/16721 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2710/16722 New viral proteins or individual genes, new structural or functional aspects of known live-attenuated or inactivated virus, VLP, viral protein 2710/18041 Use of virus, viral particle as vehicle, e.g. encapsulating small organic molecule 2710/18042 viral genome or elements thereof as genetic vector 2710/18044 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2710/18045 Special targeting system for viral vectors 2710/18051 . 2710/24131 Uses of virus other than therapeutic or	2710/24262 by genetic engineering
vaccine, e.g. disinfectant	2710/24263 by chemical treatment
2710/24132 Use of virus as therapeutic agent, other than	2710/24264 by serial passage
vaccine, e.g. as cytolytic agent	2710/24271 Demonstrated <u>in vivo</u> effect
2710/24133 Use of viral protein as therapeutic agent	2710/24288 for redistribution
other than vaccine, e.g. apoptosis inducing or anti-inflammatory	2720/00 dsRNA viruses
2710/24134 Use of virus or viral component as vaccine,	2720/00011 . Details
e.g. live-attenuated or inactivated virus, VLP, viral protein	2720/00021 • Viruses as such, e.g. new isolates, mutants or their genomic sequences
2710/24141 Use of virus, viral particle or viral elements as a vector	2720/00022 • New viral proteins or individual genes, new structural or functional aspects of known viral
2710/24142 virus or viral particle as vehicle, e.g.	proteins or genes 2720/00023 • • Virus like particles [VLP]
encapsulating small organic molecule	2720/00031 Uses of virus other than therapeutic or vaccine,
2710/24143 viral genome or elements thereof as genetic vector	e.g. disinfectant
2710/24144 Chimeric viral vector comprising heterologous viral elements for production	2720/00032 • Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
of another viral vector	2720/00033 • • Use of viral protein as therapeutic agent other
2710/24145 Special targeting system for viral vectors	than vaccine, e.g. apoptosis inducing or anti-
2710/24151 Methods of production or purification of	inflammatory
viral material	2720/00034 Use of virus or viral component as vaccine, e.g.
2710/24152 relating to complementing cells and	live-attenuated or inactivated virus, VLP, viral
packaging systems for producing virus or	protein
viral particles	2720/00041 • Use of virus, viral particle or viral elements as a
2710/24161 Methods of inactivation or attenuation	vector
2710/24162 by genetic engineering	2720/00042 virus or viral particle as vehicle, e.g. encapsulating small organic molecule
2710/24163 by chemical treatment	2720/00043 viral genome or elements thereof as genetic
2710/24164 by serial passage	vector
2710/24171 Demonstrated in vivo effect	2720/00044 Chimeric viral vector comprising heterologous
2710/24188 for redistribution	viral elements for production of another viral
2710/24211 Parapoxvirus, e.g. Orf virus	vector
2710/24221 Viruses as such, e.g. new isolates, mutants or their genomic sequences	2720/00045 Special targeting system for viral vectors
2710/24222 New viral proteins or individual genes, new	2720/00051 Methods of production or purification of viral
structural or functional aspects of known	material
viral proteins or genes	2720/00052 relating to complementing cells and packaging
2710/24223 Virus like particles [VLP]	systems for producing virus or viral particles
2710/24231 Uses of virus other than therapeutic or	2720/00061 • Methods of inactivation or attenuation
vaccine, e.g. disinfectant	2720/00062 by genetic engineering
2710/24232 Use of virus as therapeutic agent, other than	2720/00063 by chemical treatment
vaccine, e.g. as cytolytic agent	2720/00064 by serial passage
2710/24233 Use of viral protein as therapeutic agent	2720/00071 . Demonstrated <u>in vivo</u> effect 2720/00088 . for redistribution
other than vaccine, e.g. apoptosis inducing or	2720/00088
anti-inflammatory	
2710/24234 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP,	2720/10021 • • • Viruses as such, e.g. new isolates, mutants or their genomic sequences
viral protein	2720/10022 New viral proteins or individual genes, new
2710/24241 Use of virus, viral particle or viral elements	structural or functional aspects of known viral
as a vector	proteins or genes
2710/24242 virus or viral particle as vehicle, e.g.	2720/10023 Virus like particles [VLP]
encapsulating small organic molecule 2710/24243 viral genome or elements thereof as	2720/10031 Uses of virus other than therapeutic or vaccine, e.g. disinfectant
genetic vector	2720/10032 • • • Use of virus as therapeutic agent, other than
2710/24244 Chimeric viral vector comprising	vaccine, e.g. as cytolytic agent
heterologous viral elements for production of another viral vector	2720/10033 • • • Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-
2710/24245 Special targeting system for viral vectors	inflammatory
2710/24251 Methods of production or purification of	2720/10034 Use of virus or viral component as vaccine, e.g.
viral material	live-attenuated or inactivated virus, VLP, viral
2710/24252 relating to complementing cells and packaging systems for producing virus or	protein 2720/10041 Use of virus, viral particle or viral elements as
viral particles 2710/24261 Mathodo of inactivation or attenuation	a vector
2710/24261 Methods of inactivation or attenuation	

CPC - 2024.05

2710/24261 . . . Methods of inactivation or attenuation

2720/10042 virus or viral particle as vehicle, e.g. encapsulating small organic molecule	2720/12131 Uses of virus other than therapeutic or vaccine, e.g. disinfectant
2720/10043 viral genome or elements thereof as genetic vector	2720/12132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
2720/10044 Chimeric viral vector comprising heterologous viral elements for production of another viral vector	2720/12133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or
	anti-inflammatory
2720/10045 Special targeting system for viral vectors 2720/10051 Methods of production or purification of viral material	2720/12134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein
2720/10052 relating to complementing cells and	2720/12141 Use of virus, viral particle or viral elements
packaging systems for producing virus or viral particles	as a vector 2720/12142 virus or viral particle as vehicle, e.g.
2720/10061 Methods of inactivation or attenuation	encapsulating small organic molecule
2720/10062 by genetic engineering	2720/12143 viral genome or elements thereof as
2720/10063 by chemical treatment	genetic vector
2720/10064 by serial passage	2720/12144 Chimeric viral vector comprising
2720/10071 Demonstrated in vivo effect	heterologous viral elements for production
2720/10088 • • • for redistribution	of another viral vector
2720/12011 Reoviridae	2720/12145 Special targeting system for viral vectors
2720/12021 • • • • • • • • • • • • • • • • • • •	2720/12151 Methods of production or purification of
their genomic sequences	viral material
2720/12022 New viral proteins or individual genes, new	2720/12152 relating to complementing cells and
structural or functional aspects of known viral proteins or genes	packaging systems for producing virus or viral particles
2720/12023 Virus like particles [VLP]	2720/12161 Methods of inactivation or attenuation
2720/12031 Uses of virus other than therapeutic or vaccine,	2720/12162 by genetic engineering
e.g. disinfectant	2720/12163 by chemical treatment
2720/12032 Use of virus as therapeutic agent, other than	2720/12164 by serial passage
vaccine, e.g. as cytolytic agent	2720/12171 Demonstrated in vivo effect
2720/12033 Use of viral protein as therapeutic agent other	2720/12188 for redistribution
than vaccine, e.g. apoptosis inducing or anti-	2720/12211 Orthoreovirus, e.g. mammalian orthoreovirus
inflammatory	2720/12221 Viruses as such, e.g. new isolates, mutants or
2720/12034 Use of virus or viral component as vaccine, e.g.	their genomic sequences
live-attenuated or inactivated virus, VLP, viral	2720/12222 New viral proteins or individual genes, new
protein	structural or functional aspects of known
2720/12041 Use of virus, viral particle or viral elements as	viral proteins or genes
a vector	2720/12223 Virus like particles [VLP]
2720/12042 virus or viral particle as vehicle, e.g.	2720/12231 Uses of virus other than therapeutic or
encapsulating small organic molecule	vaccine, e.g. disinfectant
2720/12043 viral genome or elements thereof as genetic vector	2720/12232 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
2720/12044 Chimeric viral vector comprising	2720/12233 Use of viral protein as therapeutic agent
heterologous viral elements for production of	other than vaccine, e.g. apoptosis inducing or
another viral vector	anti-inflammatory
2720/12045 Special targeting system for viral vectors	2720/12234 Use of virus or viral component as vaccine,
2720/12051 Methods of production or purification of viral	e.g. live-attenuated or inactivated virus, VLP,
material	viral protein
2720/12052 relating to complementing cells and	2720/12241 Use of virus, viral particle or viral elements
packaging systems for producing virus or	as a vector
viral particles	2720/12242 virus or viral particle as vehicle, e.g.
2720/12061 Methods of inactivation or attenuation	encapsulating small organic molecule
2720/12062 by genetic engineering	2720/12243 viral genome or elements thereof as
2720/12063 by chemical treatment	genetic vector
2720/12064 by serial passage	2720/12244 Chimeric viral vector comprising
2720/12071 Demonstrated in vivo effect	heterologous viral elements for production
2720/12088 • • • for redistribution	of another viral vector
2720/12111 Orbivirus, e.g. bluetongue virus	2720/12245 Special targeting system for viral vectors
2720/12121 • • • Viruses as such, e.g. new isolates, mutants or	2720/12251 Methods of production or purification of
their genomic sequences	viral material
2720/12122 New viral proteins or individual genes, new	2720/12252 relating to complementing cells and
structural or functional aspects of known	packaging systems for producing virus or
viral proteins or genes	viral particles
2720/12123 Virus like particles [VLP]	2720/12261 Methods of inactivation or attenuation

2720/12262 by genetic engineering	2730/00042 virus or viral particle as vehicle, e.g.
2720/12263 by chemical treatment	encapsulating small organic molecule
2720/12264 by serial passage	2730/00043 viral genome or elements thereof as genetic
2720/12271 Demonstrated <u>in vivo</u> effect	vector
2720/12288 for redistribution	2730/00044 Chimeric viral vector comprising heterologous
2720/12311 Rotavirus, e.g. rotavirus A	viral elements for production of another viral
2720/12321 Viruses as such, e.g. new isolates, mutants or	vector
their genomic sequences	2730/00045 Special targeting system for viral vectors
2720/12322 New viral proteins or individual genes, new	2730/00051 • Methods of production or purification of viral material
structural or functional aspects of known	2730/00052 relating to complementing cells and packaging
viral proteins or genes	systems for producing virus or viral particles
2720/12323 Virus like particles [VLP]	2730/00061 • Methods of inactivation or attenuation
2720/12331 Uses of virus other than therapeutic or	2730/00062 by genetic engineering
vaccine, e.g. disinfectant 2720/12332 Use of virus as therapeutic agent, other than	2730/00063 by chemical treatment
vaccine, e.g. as cytolytic agent	2730/00064 by serial passage
2720/12333 Use of viral protein as therapeutic agent	2730/00071 • Demonstrated in vivo effect
other than vaccine, e.g. apoptosis inducing or	2730/00088 • • for redistribution
anti-inflammatory	2730/10011 Hepadnaviridae
2720/12334 Use of virus or viral component as vaccine,	2730/10021 Viruses as such, e.g. new isolates, mutants or
e.g. live-attenuated or inactivated virus, VLP,	their genomic sequences
viral protein	2730/10022 New viral proteins or individual genes, new
2720/12341 Use of virus, viral particle or viral elements	structural or functional aspects of known viral
as a vector	proteins or genes
2720/12342 virus or viral particle as vehicle, e.g.	2730/10023 Virus like particles [VLP]
encapsulating small organic molecule	2730/10031 Uses of virus other than therapeutic or vaccine,
2720/12343 viral genome or elements thereof as	e.g. disinfectant
genetic vector	2730/10032 Use of virus as therapeutic agent, other than
2720/12344 Chimeric viral vector comprising	vaccine, e.g. as cytolytic agent
heterologous viral elements for production	2730/10033 Use of viral protein as therapeutic agent other
of another viral vector	than vaccine, e.g. apoptosis inducing or anti-
2720/12345 Special targeting system for viral vectors	inflammatory
2720/12351 Methods of production or purification of	2730/10034 Use of virus or viral component as vaccine, e.g.
viral material	live-attenuated or inactivated virus, VLP, viral
2720/12352 relating to complementing cells and packaging systems for producing virus or	protein
viral particles	2730/10041 • • • Use of virus, viral particle or viral elements as a vector
2720/12361 Methods of inactivation or attenuation	2730/10042 virus or viral particle as vehicle, e.g.
2720/12362 by genetic engineering	encapsulating small organic molecule
2720/12363 by chemical treatment	2730/10043 viral genome or elements thereof as genetic
2720/12364 by serial passage	vector
2720/12371 Demonstrated in vivo effect	2730/10044 Chimeric viral vector comprising
2720/12388 for redistribution	heterologous viral elements for production of
2720/12300 • • • • • • • • • • • • • • • • • •	another viral vector

 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein Use of virus, viral particle or viral elements as a vector virus or viral particle as vehicle, e.g. encapsulating small organic molecule 	 2760/10111 Deltavirus, e.g. hepatitis delta virus 2760/10121 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2760/10122 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2760/10123 Virus like particles [VLP] 2760/10131 Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2760/10132 Use of virus as therapeutic agent, other than
 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein Use of virus, viral particle or viral elements as a vector virus or viral particle as vehicle, e.g. encapsulating small organic molecule viral genome or elements thereof as genetic vector 	 2760/10111 Deltavirus, e.g. hepatitis delta virus 2760/10121 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2760/10122 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2760/10123 Virus like particles [VLP] 2760/10131 Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2760/10132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein Use of virus, viral particle or viral elements as a vector virus or viral particle as vehicle, e.g. encapsulating small organic molecule viral genome or elements thereof as genetic vector Chimeric viral vector comprising heterologous 	 2760/10111 Deltavirus, e.g. hepatitis delta virus 2760/10121 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2760/10122 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2760/10123 Virus like particles [VLP] 2760/10131 Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2760/10132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/10133 Use of viral protein as therapeutic agent
 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein Use of virus, viral particle or viral elements as a vector virus or viral particle as vehicle, e.g. encapsulating small organic molecule viral genome or elements thereof as genetic vector 	 2760/10111 Deltavirus, e.g. hepatitis delta virus 2760/10121 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2760/10122 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2760/10123 Virus like particles [VLP] 2760/10131 Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2760/10132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent

CPC - 2024.05

2760/00045 . . . Special targeting system for viral vectors

2760/10134 Use of virus or viral component as vaccine,	2760/12121 Viruses as such, e.g. new isolates, mutants or
e.g. live-attenuated or inactivated virus, VLP, viral protein	their genomic sequences
2760/10141 Use of virus, viral particle or viral elements	2760/12122 New viral proteins or individual genes, new structural or functional aspects of known
as a vector	viral proteins or genes
2760/10142 virus or viral particle as vehicle, e.g.	2760/12123 Virus like particles [VLP]
encapsulating small organic molecule	2760/12131 Uses of virus other than therapeutic or
2760/10143 viral genome or elements thereof as	vaccine, e.g. disinfectant
genetic vector	2760/12132 Use of virus as therapeutic agent, other than
2760/10144 Chimeric viral vector comprising	vaccine, e.g. as cytolytic agent
heterologous viral elements for production	2760/12133 Use of viral protein as therapeutic agent
of another viral vector	other than vaccine, e.g. apoptosis inducing or
2760/10145 Special targeting system for viral vectors 2760/10151 Methods of production or purification of	anti-inflammatory 2760/12134 Use of virus or viral component as vaccine,
viral material	e.g. live-attenuated or inactivated virus, VLP,
2760/10152 relating to complementing cells and	viral protein
packaging systems for producing virus or	2760/12141 Use of virus, viral particle or viral elements
viral particles	as a vector
2760/10161 Methods of inactivation or attenuation	2760/12142 virus or viral particle as vehicle, e.g.
2760/10162 by genetic engineering	encapsulating small organic molecule
2760/10163 by chemical treatment	2760/12143 viral genome or elements thereof as
2760/10164 by serial passage	genetic vector
2760/10171 Demonstrated in vivo effect	2760/12144 Chimeric viral vector comprising heterologous viral elements for production
2760/10188 for redistribution	of another viral vector
2760/12011 Bunyaviridae	2760/12145 Special targeting system for viral vectors
2760/12021 Viruses as such, e.g. new isolates, mutants or their genomic sequences	2760/12151 Methods of production or purification of
2760/12022 New viral proteins or individual genes, new	viral material
structural or functional aspects of known viral	2760/12152 relating to complementing cells and
proteins or genes	packaging systems for producing virus or
2760/12023 Virus like particles [VLP]	viral particles
2760/12031 Uses of virus other than therapeutic or vaccine,	2760/12161 Methods of inactivation or attenuation
e.g. disinfectant	2760/12162 by genetic engineering
2760/12032 Use of virus as therapeutic agent, other than	2760/12164 by chemical treatment
vaccine, e.g. as cytolytic agent	2760/12164 by serial passage
2760/12033 Use of viral protein as therapeutic agent other	2760/12171 Demonstrated <u>in vivo</u> effect 2760/12188 for redistribution
than vaccine, e.g. apoptosis inducing or anti- inflammatory	2760/12211 Phlebovirus, e.g. Rift Valley fever virus
2760/12034 Use of virus or viral component as vaccine, e.g.	2760/12221 Viruses as such, e.g. new isolates, mutants or
live-attenuated or inactivated virus, VLP, viral	their genomic sequences
protein	2760/12222 New viral proteins or individual genes, new
2760/12041 Use of virus, viral particle or viral elements as	structural or functional aspects of known
a vector	viral proteins or genes
2760/12042 virus or viral particle as vehicle, e.g.	2760/12223 Virus like particles [VLP]
encapsulating small organic molecule	2760/12231 Uses of virus other than therapeutic or
2760/12043 viral genome or elements thereof as genetic	vaccine, e.g. disinfectant
vector 2760/12044 Chimeric viral vector comprising	2760/12232 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
heterologous viral elements for production of	2760/12233 Use of viral protein as therapeutic agent
another viral vector	other than vaccine, e.g. apoptosis inducing or
2760/12045 Special targeting system for viral vectors	anti-inflammatory
2760/12051 Methods of production or purification of viral	2760/12234 Use of virus or viral component as vaccine,
material	e.g. live-attenuated or inactivated virus, VLP,
2760/12052 relating to complementing cells and	viral protein
packaging systems for producing virus or	2760/12241 Use of virus, viral particle or viral elements
viral particles	as a vector
2760/12061 Methods of inactivation or attenuation	2760/12242 virus or viral particle as vehicle, e.g.
2760/12062 by genetic engineering	encapsulating small organic molecule 2760/12243 viral genome or elements thereof as
2760/12063 by chemical treatment 2760/12064 by serial passage	genetic vector
2760/12071 Demonstrated <u>in vivo</u> effect	2760/12244 Chimeric viral vector comprising
2760/12088 for redistribution	heterologous viral elements for production
2760/12111 Hantavirus, e.g. Hantaan virus	of another viral vector
,,	2760/12245 Special targeting system for viral vectors

2760/12251 Methods of production or purification of viral material	2760/14134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP,
2760/12252 relating to complementing cells and packaging systems for producing virus or viral particles	viral protein 2760/14141 Use of virus, viral particle or viral elements as a vector
2760/12261 Methods of inactivation or attenuation	2760/14142 virus or viral particle as vehicle, e.g.
2760/12262 by genetic engineering	encapsulating small organic molecule
2760/12263 by chemical treatment	2760/14143 viral genome or elements thereof as
2760/12264 by serial passage	genetic vector
2760/12271 Demonstrated <u>in vivo</u> effect	2760/14144 Chimeric viral vector comprising
2760/12288 for redistribution	heterologous viral elements for production of another viral vector
2760/14011 Filoviridae	2760/14145 Special targeting system for viral vectors
2760/14021 Viruses as such, e.g. new isolates, mutants or their genomic sequences	2760/14151 Methods of production or purification of
2760/14022 New viral proteins or individual genes, new	viral material
structural or functional aspects of known viral	2760/14152 relating to complementing cells and
proteins or genes	packaging systems for producing virus or
2760/14023 Virus like particles [VLP]	viral particles 2760/14161 Methods of inactivation or attenuation
2760/14031 Uses of virus other than therapeutic or vaccine,	2760/14162 by genetic engineering
e.g. disinfectant 2760/14032 Use of virus as therapeutic agent, other than	2760/14163 by chemical treatment
vaccine, e.g. as cytolytic agent	2760/14164 by serial passage
2760/14033 Use of viral protein as therapeutic agent other	2760/14171 Demonstrated in vivo effect
than vaccine, e.g. apoptosis inducing or anti-	2760/14188 for redistribution
inflammatory	2760/14211 Marburgvirus, e.g. lake Victoria marburgvirus
2760/14034 Use of virus or viral component as vaccine, e.g.	2760/14221 Viruses as such, e.g. new isolates, mutants or
live-attenuated or inactivated virus, VLP, viral protein	their genomic sequences 2760/14222 New viral proteins or individual genes, new
2760/14041 Use of virus, viral particle or viral elements as	structural or functional aspects of known
a vector	viral proteins or genes
2760/14042 virus or viral particle as vehicle, e.g.	2760/14223 Uses of virus other than therapeutic or
encapsulating small organic molecule	vaccine, e.g. disinfectant
2760/14043 viral genome or elements thereof as genetic vector	2760/14231 Uses of virus other than therapeutic or vaccine, e.g. disinfectant
2760/14044 Chimeric viral vector comprising	2760/14232 Use of virus as therapeutic agent, other than
heterologous viral elements for production of	vaccine, e.g. as cytolytic agent
another viral vector	2760/14233 Use of viral protein as therapeutic agent
2760/14045 Special targeting system for viral vectors	other than vaccine, e.g. apoptosis inducing or
2760/14051 Methods of production or purification of viral	anti-inflammatory
material 2760/14052 relating to complementing cells and	2760/14234 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP,
packaging systems for producing virus or	viral protein
viral particles	2760/14241 Use of virus, viral particle or viral elements
2760/14061 Methods of inactivation or attenuation	as a vector
2760/14062 by genetic engineering	2760/14242 virus or viral particle as vehicle, e.g.
2760/14063 by chemical treatment	encapsulating small organic molecule
2760/14064 by serial passage	2760/14243 viral genome or elements thereof as genetic vector
2760/14071 Demonstrated <u>in vivo</u> effect 2760/14088 for redistribution	2760/14244 Chimeric viral vector comprising
2760/14111 Ebolavirus, e.g. Zaire ebolavirus	heterologous viral elements for production
2760/14121 Viruses as such, e.g. new isolates, mutants or	of another viral vector
their genomic sequences	2760/14245 Special targeting system for viral vectors
2760/14122 New viral proteins or individual genes, new	2760/14251 Methods of production or purification of
structural or functional aspects of known	viral material 2760/14252 relating to complementing cells and
viral proteins or genes	packaging systems for producing virus or
2760/14123 Virus like particles [VLP] 2760/14131 Uses of virus other than therapeutic or	viral particles
vaccine, e.g. disinfectant	2760/14261 Methods of inactivation or attenuation
2760/14132 Use of virus as therapeutic agent, other than	2760/14262 by genetic engineering
vaccine, e.g. as cytolytic agent	2760/14263 by chemical treatment
2760/14133 Use of viral protein as therapeutic agent	2760/14264 by serial passage
other than vaccine, e.g. apoptosis inducing or	2760/14271 Demonstrated <u>in vivo</u> effect 2760/14288 for redistribution
anti-inflammatory	2760/16011 . Orthomyxoviridae
	v v ormonijavinimo

2760/16021 Viruses as such, e.g. new isolates, mutants or	2760/16151 Methods of production or purification of
their genomic sequences	viral material
2760/16022 New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes	2760/16152 relating to complementing cells and packaging systems for producing virus or viral particles
2760/16023 Virus like particles [VLP]	2760/16161 Methods of inactivation or attenuation
2760/16031 Uses of virus other than therapeutic or vaccine,	2760/16162 by genetic engineering
e.g. disinfectant	2760/16163 by chemical treatment
2760/16032 Use of virus as therapeutic agent, other than	2760/16164 by serial passage
vaccine, e.g. as cytolytic agent	2760/16171 Demonstrated <u>in vivo</u> effect
2760/16033 Use of viral protein as therapeutic agent other	2760/16188 for redistribution
than vaccine, e.g. apoptosis inducing or anti- inflammatory	2760/16211 Influenzavirus B, i.e. influenza B virus
2760/16034 Use of virus or viral component as vaccine, e.g.	2760/16221 Viruses as such, e.g. new isolates, mutants or
live-attenuated or inactivated virus, VLP, viral	their genomic sequences
protein	2760/16222 New viral proteins or individual genes, new structural or functional aspects of known
2760/16041 Use of virus, viral particle or viral elements as	viral proteins or genes
a vector	2760/16223 Virus like particles [VLP]
2760/16042 virus or viral particle as vehicle, e.g.	2760/16231 Uses of virus other than therapeutic or
encapsulating small organic molecule	vaccine, e.g. disinfectant
2760/16043 viral genome or elements thereof as genetic	2760/16232 Use of virus as therapeutic agent, other than
vector	vaccine, e.g. as cytolytic agent
2760/16044 Chimeric viral vector comprising heterologous viral elements for production of	2760/16233 Use of viral protein as therapeutic agent
another viral vector	other than vaccine, e.g. apoptosis inducing or
2760/16045 Special targeting system for viral vectors	anti-inflammatory
2760/16051 Methods of production or purification of viral	2760/16234 Use of virus or viral component as vaccine,
material	e.g. live-attenuated or inactivated virus, VLP, viral protein
2760/16052 relating to complementing cells and	2760/16241 Use of virus, viral particle or viral elements
packaging systems for producing virus or	as a vector
viral particles	2760/16242 virus or viral particle as vehicle, e.g.
2760/16061 Methods of inactivation or attenuation	encapsulating small organic molecule
2760/16062 by genetic engineering	2760/16243 viral genome or elements thereof as
2760/16063 by chemical treatment	genetic vector
2760/16064 by serial passage	2760/16244 Chimeric viral vector comprising
2760/16071 Demonstrated <u>in vivo</u> effect 2760/16088 for redistribution	heterologous viral elements for production of another viral vector
2760/16111 Influenzavirus A, i.e. influenza A virus	2760/16245 Special targeting system for viral vectors
2760/16121 Viruses as such, e.g. new isolates, mutants or	2760/16251 Methods of production or purification of
their genomic sequences	viral material
2760/16122 New viral proteins or individual genes, new	2760/16252 relating to complementing cells and
structural or functional aspects of known	packaging systems for producing virus or
viral proteins or genes	viral particles
2760/16123 Virus like particles [VLP]	2760/16261 Methods of inactivation or attenuation
2760/16131 Uses of virus other than therapeutic or	2760/16262 by genetic engineering
vaccine, e.g. disinfectant	2760/16263 by chemical treatment
2760/16132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent	2760/16264 by serial passage
2760/16133 Use of viral protein as therapeutic agent	2760/16299 Demonstrated in vivo effect
other than vaccine, e.g. apoptosis inducing or	2760/16288 for redistribution 2760/16311 Influenzavirus C, i.e. influenza C virus
anti-inflammatory	2760/16321 Viruses as such, e.g. new isolates, mutants or
2760/16134 Use of virus or viral component as vaccine,	their genomic sequences
e.g. live-attenuated or inactivated virus, VLP,	2760/16322 New viral proteins or individual genes, new
viral protein	structural or functional aspects of known
2760/16141 Use of virus, viral particle or viral elements	viral proteins or genes
as a vector	2760/16323 Virus like particles [VLP]
2760/16142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule	2760/16331 Uses of virus other than therapeutic or
2760/16143 viral genome or elements thereof as	vaccine, e.g. disinfectant
genetic vector	2760/16332 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
2760/16144 Chimeric viral vector comprising	2760/16333 Use of viral protein as therapeutic agent
heterologous viral elements for production	other than vaccine, e.g. apoptosis inducing or
of another viral vector	anti-inflammatory
2760/16145 Special targeting system for viral vectors	

2760/16334 Use of virus or viral component as vaccine,	2760/18121 Viruses as such, e.g. new isolates, mutants or
e.g. live-attenuated or inactivated virus, VLP, viral protein	their genomic sequences
2760/16341 Use of virus, viral particle or viral elements	2760/18122 New viral proteins or individual genes, new structural or functional aspects of known
as a vector	viral proteins or genes
2760/16342 virus or viral particle as vehicle, e.g.	2760/18123 Virus like particles [VLP]
encapsulating small organic molecule	2760/18131 Uses of virus other than therapeutic or
2760/16343 viral genome or elements thereof as	vaccine, e.g. disinfectant
genetic vector	2760/18132 Use of virus as therapeutic agent, other than
2760/16344 Chimeric viral vector comprising	vaccine, e.g. as cytolytic agent
heterologous viral elements for production	2760/18133 Use of viral protein as therapeutic agent
of another viral vector 2760/16345 Special targeting system for viral vectors	other than vaccine, e.g. apoptosis inducing or
2760/16351 Methods of production or purification of	anti-inflammatory 2760/18134 Use of virus or viral component as vaccine,
viral material	e.g. live-attenuated or inactivated virus, VLP,
2760/16352 relating to complementing cells and	viral protein
packaging systems for producing virus or	2760/18141 Use of virus, viral particle or viral elements
viral particles	as a vector
2760/16361 Methods of inactivation or attenuation	2760/18142 virus or viral particle as vehicle, e.g.
2760/16362 by genetic engineering	encapsulating small organic molecule
2760/16363 by chemical treatment	2760/18143 viral genome or elements thereof as
2760/16364 by serial passage	genetic vector 2760/18144 Chimeric viral vector comprising
2760/16371 Demonstrated in vivo effect	heterologous viral elements for production
2760/16388 for redistribution 2760/18011 Paramyxoviridae	of another viral vector
2760/18021 • Viruses as such, e.g. new isolates, mutants or	2760/18145 Special targeting system for viral vectors
their genomic sequences	2760/18151 Methods of production or purification of
2760/18022 New viral proteins or individual genes, new	viral material
structural or functional aspects of known viral	2760/18152 relating to complementing cells and
proteins or genes	packaging systems for producing virus or
2760/18023 Virus like particles [VLP]	viral particles 2760/18161 Methods of inactivation or attenuation
2760/18031 Uses of virus other than therapeutic or vaccine,	2760/18162 by genetic engineering
e.g. disinfectant	2760/18163 by chemical treatment
2760/18032 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent	2760/18164 by serial passage
2760/18033 • • • Use of viral protein as therapeutic agent other	2760/18171 Demonstrated in vivo effect
than vaccine, e.g. apoptosis inducing or anti-	2760/18188 for redistribution
inflammatory	2760/18211 Henipavirus, e.g. hendra virus
2760/18034 Use of virus or viral component as vaccine, e.g.	2760/18221 Viruses as such, e.g. new isolates, mutants or
live-attenuated or inactivated virus, VLP, viral	their genomic sequences
protein	2760/18222 New viral proteins or individual genes, new
2760/18041 Use of virus, viral particle or viral elements as	structural or functional aspects of known
a vector 2760/18042 virus or viral particle as vehicle, e.g.	viral proteins or genes 2760/18223 Virus like particles [VLP]
encapsulating small organic molecule	2760/18231 Uses of virus other than therapeutic or
2760/18043 viral genome or elements thereof as genetic	vaccine, e.g. disinfectant
vector	2760/18232 Use of virus as therapeutic agent, other than
2760/18044 Chimeric viral vector comprising	vaccine, e.g. as cytolytic agent
heterologous viral elements for production of	2760/18233 Use of viral protein as therapeutic agent
another viral vector	other than vaccine, e.g. apoptosis inducing or
2760/18045 Special targeting system for viral vectors	anti-inflammatory
2760/18051 Methods of production or purification of viral material	2760/18234 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP,
2760/18052 relating to complementing cells and	viral protein
packaging systems for producing virus or	2760/18241 Use of virus, viral particle or viral elements
viral particles	as a vector
2760/18061 Methods of inactivation or attenuation	2760/18242 virus or viral particle as vehicle, e.g.
2760/18062 by genetic engineering	encapsulating small organic molecule
2760/18063 by chemical treatment	2760/18243 viral genome or elements thereof as
2760/18064 by serial passage	genetic vector
2760/18071 Demonstrated in vivo effect	2760/18244 Chimeric viral vector comprising
2760/18088 for redistribution	heterologous viral elements for production of another viral vector
2760/18111 Avulavirus, e.g. Newcastle disease virus	2760/18245 Special targeting system for viral vectors

2760/18251 Methods of production or purification of viral material	2760/18434 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP,
2760/18252 relating to complementing cells and packaging systems for producing virus or	viral protein 2760/18441 Use of virus, viral particle or viral elements
viral particles 2760/19261 Mathods of inactivation or attenuation	as a vector
2760/18261 Methods of inactivation or attenuation 2760/18262 by genetic engineering	2760/18442 virus or viral particle as vehicle, e.g. encapsulating small organic molecule
2760/18263 by chemical treatment	2760/18443 viral genome or elements thereof as
2760/18264 by chemical treatment	genetic vector
2760/18271 Demonstrated in vivo effect	2760/18444 Chimeric viral vector comprising
2760/18288 for redistribution	heterologous viral elements for production
2760/18311 Metapneumovirus, e.g. avian pneumovirus	of another viral vector
2760/18321 Viruses as such, e.g. new isolates, mutants or	2760/18445 Special targeting system for viral vectors
their genomic sequences	2760/18451 Methods of production or purification of
2760/18322 New viral proteins or individual genes, new	viral material
structural or functional aspects of known	2760/18452 relating to complementing cells and
viral proteins or genes	packaging systems for producing virus or
2760/18323 Virus like particles [VLP]	viral particles 2760/18461 Methods of inactivation or attenuation
2760/18331 Uses of virus other than therapeutic or	
vaccine, e.g. disinfectant	2760/18462 by genetic engineering 2760/18463 by chemical treatment
2760/18332 Use of virus as therapeutic agent, other than	2760/18464 by chemical treatment
vaccine, e.g. as cytolytic agent	2760/18471 Demonstrated in vivo effect
2760/18333 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or	2760/18488 For redistribution
anti-inflammatory	2760/18511 Pneumovirus, e.g. human respiratory syncytial
2760/18334 Use of virus or viral component as vaccine,	virus
e.g. live-attenuated or inactivated virus, VLP,	2760/18521 Viruses as such, e.g. new isolates, mutants or
viral protein	their genomic sequences
2760/18341 Use of virus, viral particle or viral elements	2760/18522 New viral proteins or individual genes, new
as a vector	structural or functional aspects of known
2760/18342 virus or viral particle as vehicle, e.g.	viral proteins or genes
encapsulating small organic molecule	2760/18523 Virus like particles [VLP]
2760/18343 viral genome or elements thereof as	2760/18531 Uses of virus other than therapeutic or
genetic vector	vaccine, e.g. disinfectant
2760/18344 Chimeric viral vector comprising heterologous viral elements for production	2760/18532 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
of another viral vector	2760/18533 Use of viral protein as therapeutic agent
2760/18345 Special targeting system for viral vectors	other than vaccine, e.g. apoptosis inducing or
2760/18351 Methods of production or purification of	anti-inflammatory
viral material	2760/18534 Use of virus or viral component as vaccine,
2760/18352 relating to complementing cells and	e.g. live-attenuated or inactivated virus, VLP,
packaging systems for producing virus or	viral protein
viral particles	2760/18541 Use of virus, viral particle or viral elements
2760/18361 Methods of inactivation or attenuation	as a vector
2760/18362 by genetic engineering	2760/18542 virus or viral particle as vehicle, e.g.
2760/18363 by chemical treatment	encapsulating small organic molecule 2760/18543 viral genome or elements thereof as
2760/18364 by serial passage	genetic vector
2760/18371 Demonstrated in vivo effect	2760/18544 Chimeric viral vector comprising
2760/18388 for redistribution 2760/18411 Morbillivirus, e.g. Measles virus, canine	heterologous viral elements for production
distemper	of another viral vector
2760/18421 Viruses as such, e.g. new isolates, mutants or	2760/18545 Special targeting system for viral vectors
their genomic sequences	2760/18551 Methods of production or purification of
2760/18422 New viral proteins or individual genes, new	viral material
structural or functional aspects of known	2760/18552 relating to complementing cells and
viral proteins or genes	packaging systems for producing virus or
2760/18423 Virus like particles [VLP]	viral particles 2760/18561 Methods of inactivation or attenuation
2760/18431 Uses of virus other than therapeutic or	2760/18562 by genetic engineering
vaccine, e.g. disinfectant	2760/18563 by generic engineering
2760/18432 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent	2760/18564 by serial passage
2760/18433 Use of viral protein as therapeutic agent	2760/18571 Demonstrated in vivo effect
other than vaccine, e.g. apoptosis inducing or	2760/18588 for redistribution
anti-inflammatory

New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/000 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/000 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00033 . Virus like particles [VLP] 2770/00034 . Use of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00033 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00034 . Use of virus or viral component as vaccine, e.g.
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or viral particles	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00033 . Virus like particles [VLP] 2770/00034 . Use of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00033 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20161 Methods of inactivation or attenuation	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00033 . Virus like particles [VLP] 2770/00034 . Use of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00035 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00036 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20161 Methods of inactivation or attenuation 2760/20162 by genetic engineering	 2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a vector
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20162 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20163 Methods of inactivation or attenuation 2760/20163 by genetic engineering	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/000 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 . Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a vector 2770/00042 virus or viral particle as vehicle, e.g.
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20161 Methods of inactivation or attenuation 2760/20162 by genetic engineering	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a vector 2770/00042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20162 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20163 Methods of inactivation or attenuation 2760/20163 by genetic engineering	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/000 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a vector 2770/00042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2770/00043 . viral genome or elements thereof as genetic
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 . Methods of production or purification of viral material 2760/20152 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20161 Methods of inactivation or attenuation 2760/20162 by genetic engineering 2760/20163 by chemical treatment 2760/20164 by serial passage 2760/20171 Demonstrated in vivo effect	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/00 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 . Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2770/00041 . Use of virus, viral particle or viral elements as a vector 2770/00042 . virus or viral particle as vehicle, e.g. encapsulating small organic molecule
vaccine, e.g. disinfectant 2760/20132 Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2760/20133 Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2760/20134 Use of virus or viral component as vaccine, e.g. live-attenuated or inactivated virus, VLP, viral protein 2760/20141 Use of virus, viral particle or viral elements as a vector 2760/20142 virus or viral particle as vehicle, e.g. encapsulating small organic molecule 2760/20143 viral genome or elements thereof as genetic vector 2760/20144 Chimeric viral vector comprising heterologous viral elements for production of another viral vector 2760/20145 Special targeting system for viral vectors 2760/20151 Methods of production or purification of viral material 2760/20162 relating to complementing cells and packaging systems for producing virus or viral particles 2760/20161 Methods of inactivation or attenuation 2760/20162 by genetic engineering 2760/20163 by chemical treatment 2760/20164 by serial passage	2760/20262 by genetic engineering 2760/20263 by chemical treatment 2760/20264 by serial passage 2760/20271 Demonstrated in vivo effect 2760/20288 for redistribution 2770/000 ssRNA viruses positive-sense 2770/00011 . Details 2770/00021 Viruses as such, e.g. new isolates, mutants or their genomic sequences 2770/00022 . New viral proteins or individual genes, new structural or functional aspects of known viral proteins or genes 2770/00023 . Virus like particles [VLP] 2770/00031 . Uses of virus other than therapeutic or vaccine, e.g. disinfectant 2770/00032 . Use of virus as therapeutic agent, other than vaccine, e.g. as cytolytic agent 2770/00033 . Use of viral protein as therapeutic agent other than vaccine, e.g. apoptosis inducing or anti-inflammatory 2770/00034 .
