# CPC COOPERATIVE PATENT CLASSIFICATION

## C CHEMISTRY; METALLURGY

(NOTES omitted)

### **METALLURGY**

### C21 METALLURGY OF IRON

# C21B MANUFACTURE OF IRON OR STEEL (preliminary treatment of ferrous ores or scrap C22B 1/00; electric heating H05B)

#### **NOTE**

This subclass covers:

- the production of iron or steel from source materials, e.g. the production of pig-iron;
- apparatus specially adapted therefor, e.g. blast furnaces or air heaters.

#### **WARNING**

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

3/00	General features in the manufacture of pig-iron	7/12	. Opening or sealing the tap holes
	(mixers for pig-iron <u>C21C 1/06</u> )	7/125	• • {Refractory plugging mass}
3/02	<ul> <li>by applying additives, e.g. fluxing agents</li> </ul>	7/14	<ul> <li>Discharging devices, e.g. for slag</li> </ul>
3/04	<ul> <li>Recovery of by-products, e.g. slag</li> </ul>	7/16	. Tuyéres
3/06	• • Treatment of liquid slag (slag wool <u>C03B</u> ; slag	7/163	• • {Blowpipe assembly}
	stones <u>C04B</u> )	7/166	• • {Tuyere replacement apparatus}
3/08	Cooling slag	7/18	Bell-and-hopper arrangements
3/10	Slag pots; Slag cars	7/20	• • with appliances for distributing the burden
<b>5/00</b> 5/001 5/002	<ul><li>Making pig-iron in the blast furnace</li><li>{Injecting additional fuel or reducing agents}</li><li>{Heated electrically (plasma)}</li></ul>	7/205 7/22	<ul> <li>• {Details concerning the gear-box driving the charge distribution system}</li> <li>• Dust arresters</li> </ul>
5/003	• • {Injection of pulverulent coal}	7/24	. Test rods or other checking devices
5/004	• • • {Injection of slurries}	9/00	Stoves for heating the blast in blast furnaces
2005/005	• • {Selection or treatment of the reducing gases}	9/02	Brick hot-blast stoves
5/006	• {Automatically controlling the process}	9/04	• • with combustion shaft
5/007	• {Conditions of the cokes or characterised by the	9/06	Linings
	cokes used}	9/08	<ul> <li>Iron hot-blast stoves</li> </ul>
5/008	• {Composition or distribution of the charge}	9/10	• Other details, e.g. blast mains
5/02	<ul> <li>Making special pig-iron, e.g. by applying additives, e.g. oxides of other metals</li> </ul>	9/12	• Hot-blast valves or slides for blast furnaces (valves in general <u>F16K</u> )
5/023	• • {Injection of the additives into the melting part}	9/14	<ul> <li>Preheating the combustion air</li> </ul>
5/026	• • • {of plastic material}	9/16	<ul> <li>Cooling or drying the hot-blast</li> </ul>
5/04	<ul> <li>Making slag of special composition</li> </ul>	11/00	Making nig ivan ather than in blact francess
5/06	<ul> <li>using top gas in the blast furnace process (in coke</li> </ul>	11/00	Making pig-iron other than in blast furnaces . in low shaft furnaces { or shaft furnaces }
	ovens C10B)	11/02	•
7/00	Blast furnaces (lifts associated with blast furnaces	11/08	<ul><li>in rotary kilns</li><li>in hearth-type furnaces</li></ul>
	B66B 9/06)	11/08	in electric furnaces
7/002	• {Evacuating and treating of exhaust gases}	11/10	· III electric furnaces
7/005	• • {Bleeder valves or slides}	13/00	Making spongy iron or liquid steel, by direct
7/007	• {Controlling or regulating of the top pressure}		processes
7/02	Internal forms	13/0006	• {obtaining iron or steel in a molten state}
7/04	• with special refractories (refractory materials <u>C04B</u> )	13/0013	<ul> <li>{introduction of iron oxide into a bath of molten iron containing a carbon reductant}</li> </ul>
7/06 7/08	<ul><li>Linings for furnaces</li><li>Top armourings</li></ul>	13/002	{Reduction of iron ores by passing through a
	*		heated column of carbon}
7/10 7/103	<ul> <li>Cooling; Devices therefor</li> <li>{Detection of leakages of the cooling liquid}</li> </ul>	13/0026	• • {introduction of iron oxide in the flame of a burner or a hot gas stream}
7/106	• • {Cooling of the furnace bottom}		

CPC - 2024.05

13/0033	• {In fluidised bed furnaces or apparatus containing a dispersion of the material}	2100/80	Interaction of exhaust gases produced during the manufacture of iron or steel with other processes
13/004 13/0046	<ul><li> {in a continuous way by reduction from ores}</li><li> {making metallised agglomerates or iron oxide}</li></ul>	2200/00	Recycling of non-gaseous waste material
13/0053	. {On a massing grate}	2300/00	Process aspects
13/006	• {Starting from ores containing non ferrous metallic	2300/02	Particular sequence of the process steps
15/000	oxides}	2300/04	Modeling of the process, e.g. for control purposes;
13/0066	{Preliminary conditioning of the solid carbonaceous reductant}	2300/01	CII
13/0073	• {Selection or treatment of the reducing gases}	2400/00	Treatment of slags originating from iron or steel
13/00/3	• {Use of special additives or fluxing agents}		processes
13/0086	• {Conditioning, transformation of reduced iron ores}	2400/02	Physical or chemical treatment of slags
13/0093	<ul> <li>(Conditioning, transformation of reduced from ores)</li> <li>(Protecting against oxidation)</li> </ul>	2400/022	Methods of cooling or quenching molten slag
13/00/3	in shaft furnaces	2400/024	with the direct use of steam or liquid coolants,
13/023	• • {wherein iron or steel is obtained in a molten		e.g. water
	state}	2400/026	using air, inert gases or removable conductive bodies
13/026	• • {heated electrically}	2400/028	with the permanent addition of cooled slag or
13/029	• • {Introducing coolant gas in the shaft furnaces}		other solids
13/04	• in retorts	2400/03	Removing sulfur
13/06	in multi-storied furnaces	2400/032	Separating slag from liquid, e.g. from water, after
13/08	• in rotary furnaces		quenching
13/085	<ul><li>• {wherein iron or steel is obtained in a molten state}</li></ul>	2400/034	Stirring or agitating by pressurised fluids or by moving apparatus
13/10	<ul> <li>in hearth-type furnaces</li> </ul>	2400/04	Specific shape of slag after cooling
13/105	• • {Rotary hearth-type furnaces}	2400/042	Sheets
13/12	in electric furnaces	2400/044	Briquettes or moulded bodies other than sheets
13/125	• • {By using plasma}	2400/05	Apparatus features
13/14	<ul> <li>Multi-stage processes {processes carried out in</li> </ul>	2400/052	. including rotating parts
	different vessels or furnaces}	2400/054	Disc-shaped or conical parts for cooling,
13/143	<ul> <li>{Injection of partially reduced ore into a molten bath}</li> </ul>		dispersing or atomising of molten slag rotating along vertical axis
13/146	• • {Multi-step reduction without melting}	2400/056	Drums whereby slag is poured on or in between
15/00	Other management from the manufacture of income	2400/058	Rotating beds on which slag is cooled
15/00	Other processes for the manufacture of iron from iron compounds (general methods of reducing to	2400/06	Conveyors on which slag is cooled
	metal C22B 5/00; by electrolysis C25C 1/06)	2400/062	Jet nozzles or pressurised fluids for cooling,
15/003	• {By using nuclear energy}	2400/064	fragmenting or atomising slag  • Thermally-conductive removable bodies, e.g.
15/006	• {By a chloride process}	2400/004	balls
15/02	Metallothermic processes, e.g. thermit reduction	2400/066	Receptacle features where the slag is treated
15/04	from iron carbonyl	2400/068	with a sealed or controlled environment
2100/00	Handling of exhaust gases produced during the	2400/000	open to atmosphere
2100/00	manufacture of iron or steel	2400/072	Tanks to collect the slag, e.g. water tank
2100/20	Increasing the gas reduction potential of recycled	2400/074	Tower structures for cooling, being confined
	exhaust gases		but not sealed
2100/22	by reforming	2400/076	Fluidised bed for cooling
2100/24	by shift reactions	2400/08	• with energy recovery
2100/26	by adding additional fuel in recirculation pipes		
2100/28	• by separation		
2100/282	of carbon dioxide		
2100/284	of nitrogen		
2100/40	Gas purification of exhaust gases to be recirculated or used in other metallurgical processes		
2100/42	Sulphur removal		
2100/44	Removing particles, e.g. by scrubbing, dedusting		
2100/60	Process control or energy utilisation in the manufacture of iron or steel		
2100/62	• Energy conversion other than by heat exchange, e.g. by use of exhaust gas in energy production		
2100/64	• Controlling the physical properties of the gas, e.g.		
	pressure or temperature		
2100/66	Heat exchange
