D10 INDEXING SCHEME ASSOCIATED WITH SUBLASSES OF SECTION <u>D</u>, RELATING TO TEXTILES

D10B INDEXING SCHEME ASSOCIATED WITH SUBLASSES OF SECTION **D**, RELATING TO TEXTILES

<u>NOTES</u>

- 1. This subclass constitutes a scheme for indexing only.
- 2. The indexing codes of this subclass, relating to the chemical constitution of the fibrous materials, are to be associated with groups of section <u>D</u>, with the exception of those of subclass <u>D06M</u>, as far as these groups themselves do not give information about the chemical nature of the fibres.
- In a number of fields, the indexing codes relating to the chemical constitution of the fibrous materials are not allotted to documents having an abstract in which the chemical constitution is clearly stated, e.g. if the abstract mentions "polyamide", code <u>D10B 2331/021</u> is not allotted.
- 4. Blends of fibres are indexed according to each constituent fibre.
