CPC COOPERATIVE PATENT CLASSIFICATION

G PHYSICS

(NOTES omitted)

INSTRUMENTS

G01 MEASURING; TESTING (NOTES omitted)

G01K MEASURING TEMPERATURE; MEASURING QUANTITY OF HEAT; THERMALLY-SENSITIVE ELEMENTS NOT OTHERWISE PROVIDED FOR (radiation pyrometry G01J 5/00)

NOTES

- 1. In this subclass, the following term is used with the meaning indicated :
 - "thermometer" includes thermally-sensitive elements not provided for in other subclasses.
- 2. Attention is drawn to the Notes following the title of class <u>G01</u>.
- 3. Attention is drawn to the Notes following the titles of class <u>B81</u> and subclass <u>B81B</u> relating to "microstructural devices" and "microstructural systems".

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

| 1/00 | Details of thermometers not specially adapted | 1/22 | • • by means of fluid contained in a hollow |
|-------|--|----------|---|
| | for particular types of thermometer (circuits for | | body having parts which are deformable or |
| | reducing thermal inertia G01K 7/42) | | displaceable under the pressure developed by the |
| 1/02 | . Means for indicating or recording specially adapted | | fluid |
| | for thermometers | 1/24 | • • by means of compounded strips or plates, e.g. by |
| 1/022 | for recording | | bimetallic strips |
| 1/024 | for remote indication | 1/26 | Compensating for effects of pressure changes |
| 1/026 | • • {arrangements for monitoring a plurality of temperatures, e.g. by multiplexing} | 3/00 | Thermometers giving results other than momentary value of temperature (G01K 7/42 takes |
| 1/028 | • • {arrangements for numerical indication} | | precedence) |
| 1/04 | • • Scales | 3/005 | • {Circuits arrangements for indicating a |
| 1/045 | • • • { temperature indication combined with the indication of another variable (indicating of | 5,005 | predetermined temperature (fire detection <u>G08B 17/00</u>)} |
| | human comfort <u>G01W 1/17</u>)} | 3/02 | • giving means values; giving integrated values |
| 1/06 | Arrangements for facilitating reading, e.g. | 3/04 | . in respect of time |
| | illumination, magnifying glass | 3/06 | • in respect of space |
| 1/065 | • • • {of liquid column thermometers} | 3/08 | • giving differences of values (using thermoelectric |
| 1/08 | • Protective devices, e.g. casings | | elements G01K 7/02); giving differentiated values |
| 1/10 | for preventing chemical attack | 3/10 | • in respect of time, e.g. reacting only to a quick |
| 1/105 | • • • {for siderurgical use} | | change of temperature |
| 1/12 | • for preventing damage due to heat overloading | 3/12 | based upon expansion or contraction of |
| 1/125 | • • • {for siderurgical use} | | materials |
| 1/14 | • Supports; Fastening devices; Arrangements for | 3/14 | in respect of space |
| | mounting thermometers in particular locations | 2003/145 | • • • {Hotspot localization} |
| 1/143 | • for measuring surface temperatures | 5/00 | Measuring temperature based on the expansion |
| 1/146 | • • {arrangements for moving thermometers to or | 5/00 | or contraction of a material (<u>G01K 9/00</u> takes |
| 1/10 | from a measuring position } | | precedence; giving other than momentary value of |
| 1/16 | • Special arrangements for conducting heat from the object to the sensitive element | | temperature $\underline{G01K 3/00}$) |
| 1/165 | . {for application in zero heat flux sensors} | 5/02 | • the material being a liquid (contained in a hollow |
| 1/105 | | | body having parts which are deformable or |
| 1/18 | for reducing thermal inertiaCompensating for effects of temperature changes | | displaceable under the pressure developed by the |
| 1/20 | other than those to be measured, e.g. changes in | | material <u>G01K 5/32</u>) |
| | other than those to be measured, e.g. challges m | 5/025 | • • {Manufacturing of this particular type of |

| 5/38 5/40 5/42 5/44 5/46 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication |
| 5/38 5/40 5/42 5/44 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking |
| 5/38 5/40 5/42 5/44 5/46 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/48 | . of spiral formation . of helical formation . the body being a bellows . the body being a cylinder and piston . with electric conversion means for final indication . {using electrical contact making or breaking devices} . the material being a solid |
| 5/38 5/40 5/42 5/44 5/46 | . of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/48 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 5/486 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 5/483 5/486 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 5/483 5/486 5/50 5/52 5/54 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 5/483 5/486 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 5/483 5/486 5/50 5/52 5/54 5/56 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements constrained so that expansion or contraction causes a deformation of the solid |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 5/483 5/486 5/50 5/52 5/54 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements constrained so that expansion or contraction causes a deformation of the solid the solid body being constrained at more |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 5/483 5/486 5/50 5/52 5/54 5/56 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements constrained so that expansion or contraction causes a deformation of the solid the solid body being constrained at more than one point, e.g. rod, plate, diaphragm |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/485 5/483 5/483 5/486 5/50 5/52 5/54 5/56 5/58 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements constrained so that expansion or contraction causes a deformation of the solid the solid body being constrained at more than one point, e.g. rod, plate, diaphragm (G01K 5/62 takes precedence) |
| 5/38 5/40 5/42 5/44 5/46 5/465 5/465 5/483 5/483 5/483 5/486 5/50 5/52 5/54 5/56 | of spiral formation of helical formation the body being a bellows the body being a cylinder and piston with electric conversion means for final indication {using electrical contact making or breaking devices} the material being a solid {using materials with a configuration memory, e.g. Ni-Ti alloys} {using microstructures, e.g. made of silicon (G01K 7/015, G01K 7/028, G01K 7/226, G01K 17/006 take precedence)} arranged for free expansion or contraction with electrical conversion means for final indication consisting of pivotally-connected elements constrained so that expansion or contraction causes a deformation of the solid the solid body being constrained at more than one point, e.g. rod, plate, diaphragm |

| 5/64 | Details of the compounds system |
|----------------|---|
| 5/66 | Selection of composition of the |
| 0,00 | components of the system |
| 5/68 | Shape of the system |
| 5/70 | specially adapted for indicating or recording |
| 5/72 | with electric transmission means for final |
| | indication |
| 7/00 | Measuring temperature based on the use of |
| | electric or magnetic elements directly sensitive to |
| | heat (giving results other than momentary value of |
| | temperature <u>G01K 3/00</u>) {; Power supply therefor, |
| 7/003 | e.g. using thermoelectric elements}{using pyroelectric elements (radiation pyrometers) |
| //003 | G01J 5/00)} |
| 7/006 | • {using superconductive elements} |
| 7/01 | • using semiconducting elements having PN |
| | junctions (G01K 7/02, G01K 7/16, G01K 7/30 take |
| | precedence) |
| 7/015 | • • {using microstructures, e.g. made of silicon} |
| 7/02 | • using thermoelectric elements, e.g. thermocouples |
| 7/021 | • {Particular circuit arrangements (<u>G01K 7/026</u> , <u>G01K 7/12</u> , <u>G01K 7/14</u> take precedence)} |
| 7/023 | (provided with specially adapted connectors) |
| 11025 | (connectors <u>per se H01R</u>)} |
| 7/025 | • {expendable thermocouples} |
| 7/026 | • Arrangements for signalling failure or |
| | disconnection of thermocouples |
| 7/028 | • • {using microstructures, e.g. made of silicon} |
| 7/04 | • the object to be measured not forming one of the |
| 7/06 | thermoelectric materials • • • the thermoelectric materials being arranged one |
| //00 | within the other with the junction at one end |
| | exposed to the object, e.g. sheathed type |
| 7/08 | • the object to be measured forming one of the |
| | thermoelectric materials, e.g. pointed type |
| 7/10 | • Arrangements for compensating for auxiliary |
| 7/10 | variables, e.g. length of lead |
| 7/12 | • • Arrangements with respect to the cold junction, e.g. preventing influence of temperature of |
| | surrounding air |
| 7/13 | Circuits for cold-junction compensation |
| 7/14 | • • Arrangements for modifying the output |
| | characteristic, e.g. linearising |
| 7/16 | • using resistive elements (resistive elements per se |
| 2007/163 | H01C, H01L) |
| 2007/163 | {provided with specially adapted connectors} {Electrical time domain reflectometry} |
| 7/18 | the element being a linear resistance, e.g. |
| //10 | platinum resistance thermometer ($G01K 7/26$ |
| | takes precedence) |
| 7/183 | • • • {characterised by the use of the resistive |
| 7/10/ | element } |
| 7/186 | • • • {using microstructures} |
| 7/20 | in a specially-adapted circuit, e.g. bridge circuit in an oscillator circuit |
| 7/203 7/206 | {in an oscillator circuit} {in a potentiometer circuit} |
| 7/208 | for modifying the output characteristic, e.g. |
| | linearising |
| 7/22 | • • the element being a non-linear resistance, e.g. |
| | thermistor (G01K 7/26 takes precedence) |
| 7/223 | • • {characterised by the shape of the resistive |
| | element } |
| | |

G01K

| 7/226 | • • {using microstructures, e.g. silicon spreading |
|--|--|
| 7/04 | resistance} |
| 7/24 | in a specially-adapted circuit, e.g. bridge circuit |
| 7/245 | • • • • {in an oscillator circuit} |
| 7/25 | for modifying the output characteristic, e.g. linearising |
| 7/26 | • • the element being an electrolyte |
| 7/28 | in a specially-adapted circuit, e.g. bridge circuit |
| 7/30 | . using thermal noise of resistances or conductors |
| 7/32 | • using change of resonant frequency of a crystal |
| 7/34 | • using capacitative elements (capacitors per se |
| | <u>H01G</u>) |
| 7/343 | • • {the dielectric constant of which is temperature dependant} |
| 7/346 | • {for measuring temperature based on the time |
| 5 /2 ¢ | delay of a signal through a series of logical ports} |
| 7/36 | using magnetic elements, e.g. magnets, coils (magnetic elements per se <u>H01F</u>) |
| 7/38 | the variations of temperature influencing the magnetic permeability |
| 7/40 | using ionisation of gases |
| 7/42 | • Circuits effecting compensation of thermal inertia; Circuits for predicting the stationary value of a |
| 2007/422 | temperature |
| 2007/422 | • • {Dummy objects used for estimating temperature of real objects} |
| 7/425 | • • {Thermal management of integrated systems} |
| 7/427 | • • {Temperature calculation based on spatial |
| | modeling, e.g. spatial inter- or extrapolation} |
| | caused by redistribution of weight, e.g. tilting |

| 11/26 | • • of resonant frequencies |
|---------|---|
| 11/265 | • • • {using surface acoustic wave [SAW]} |
| 11/28 | using measurements of density {(measuring density in general <u>G01N 9/00</u>)} |
| 11/30 | • using measurement of the effect of a material on X- radiation, gamma radiation or particle radiation |
| 11/32 | • using changes in transmittance, scattering or luminescence in optical fibres |
| 11/3206 | • at discrete locations in the fibre, e.g. using Bragg scattering |
| 11/3213 | • • using changes in luminescence, e.g. at the distal end of the fibres |
| 11/322 | • • using Brillouin scattering |
| 11/324 | • • using Raman scattering |
| 13/00 | Thermometers specially adapted for specific |
| | purposes |
| 13/006 | • {for cryogenic purposes} |
| 13/008 | • {using microstructures, e.g. made of silicon} |
| 13/02 | • for measuring temperature of moving fluids or granular materials capable of flow |
| 13/022 | • • {Suction thermometers} |
| 13/024 | • • of moving gases |
| 13/026 | • • {of moving liquids} |
| 13/028 | • { for use in total air temperature [TAT] probes } |
| 13/04 | • for measuring temperature of moving solid bodies |
| 13/06 | • in linear movement |
| 13/08 | • • in rotary movement |
| 13/10 | • for measuring temperature within piled or stacked materials (by special arrangements for conducting heat from the object to the sensitive heat element G01K 1/16) |
| 13/12 | combined with sampling devices for measuring temperatures of samples of materials |
| 13/125 | • • {for siderurgical purposes} |
| 13/20 | • Clinical contact thermometers for use with humans or animals |
| 13/223 | • • {Infrared clinical thermometers, e.g. tympanic} |
| 13/25 | • Protective devices therefor, e.g. sleeves preventing contamination |
| 13/252 | • • • {for tympanic thermometers} |
| 15/00 | Testing or calibrating of thermometers |
| 15/002 | • {Calibrated temperature sources, temperature standards therefor (arrangements with respect to the cold junction of thermo-electric elements G01K 7/12)} |
| 15/005 | • {Calibration} |
| 15/007 | • {Testing} |
| 17/00 | Measuring quantity of heat (measuring temperature by calorimetry <u>G01K 3/00</u> - <u>G01K 11/00</u> ; specially adapted for measuring thermal properties of materials, |
| | e.g. specific heat, heat of combustion <u>G01N</u>) |
| 17/003 | • {for measuring the power of light beams, e.g. laser beams} |
| 17/006 | {Microcalorimeters, e.g. using silicon microstructures} |
| 17/02 | • Calorimeters using transport of an indicating substances, e.g. evaporation calorimeters |
| 17/025 | • {where evaporation, sublimation or condensation caused by heating or cooling, is measured} |

G01K

| 17/04 | Calorimeters using compensation methods {, i.e. |
|---|--|
| | where the absorbed or released quantity of heat to |
| | be measured is compensated by a measured quantity |
| | of heating or cooling} |
| 17/06 | • Measuring quantity of heat conveyed by flowing |
| | media, e.g. in heating systems (G01K 17/02, |
| | <u>G01K 17/04</u> take precedence){e.g. the quantity |
| | of heat in a transporting medium, delivered to or |
| | consumed in an expenditure device} |
| 17/08 | based upon measurement of temperature |
| | difference {or of a temperature} |
| 17/10 | between an inlet and an outlet point, combined |
| | with measurement of rate of flow of the |
| | medium {if such, by integration during a |
| | certain time-interval} |
| 17/12 | Indicating product of flow and temperature |
| | difference directly {or temperature} |
| 17/14 | •••• using mechanical means for both |
| | measurements |
| 17/16 | • • • • • using electrical {or magnetic} means for |
| | both measurements |
| 17/18 | • • • • • using electrical {or magnetic} means for |
| | one measurement and mechanical means |
| | for the other |
| 17/185 | ••••• {where the indicating-instrument is |
| | driven electrically or magnetically |
| | by the temperature-measurement |
| | device and mechanically by the flow- |
| | measurement device} |
| 17/20 | • • • across a radiating surface, combined with |
| | ascertainment of the heat transmission |
| | coefficient {(materials therefor G01K 17/08)} |
| | |
| 19/00 | Testing or calibrating calorimeters |
| | |
