INSTRUMENTS

G08 SIGNALLING

G08C TRANSMISSION SYSTEMS FOR MEASURED VALUES, CONTROL OR SIMILAR SIGNALS (fluid pressure transmitting systems F15B; mechanical means for transferring the output of a sensing member into a different variable G01D 5/00; mechanical control system G05G)

13/00	Arrangements for influencing the relationship between signals at input and output, e.g. differentiating, delaying
13/02	• to yield a signal which is a function of two or more signals, e.g. sum or product
15/00	Arrangements characterised by the use of multiplexing for the transmission of a plurality of signals over a common path
15/02	• simultaneously, i.e. using frequency division
15/04	• the signals being modulated on carrier frequencies
15/06	• successively, i.e. using time division
15/08	• the signals being represented by amplitude of current or voltage in transmission link
15/10	• the signals being represented by frequencies or phase of current or voltage in transmission link
15/12	• the signals being represented by pulse characteristics in transmission link
17/00	Arrangements for transmitting signals characterised by the use of a wireless electrical link
17/02	• using a radio link
17/04	 using magnetically coupled devices
17/06	• using capacity coupling
19/00	Electric signal transmission systems (G08C 17/00 takes precedence)
19/02	 in which the signal transmitted is magnitude of current or voltage (<u>G08C 19/36</u>, <u>G08C 19/38</u> take precedence)
19/025	 {using fixed values of magnitude of current or voltage}
19/04	• • using variable resistance
19/06	
	• • using variable inductance
19/08	differentially influencing two coils
19/08 19/10	 differentially influencing two coils. using variable capacitance
	 differentially influencing two coils using variable capacitance in which the signal transmitted is frequency or phase of ac
19/10	 differentially influencing two coils using variable capacitance in which the signal transmitted is frequency or phase of ac using combination of fixed frequencies
19/10 19/12	 differentially influencing two coils using variable capacitance in which the signal transmitted is frequency or phase of ac
19/10 19/12 19/14	 . differentially influencing two coils . using variable capacitance in which the signal transmitted is frequency or phase of ac . using combination of fixed frequencies in which transmission is by pulses . using a variable number of pulses in a train
19/10 19/12 19/14 19/16	 differentially influencing two coils using variable capacitance in which the signal transmitted is frequency or phase of ac using combination of fixed frequencies in which transmission is by pulses
19/10 19/12 19/14 19/16 19/18	 differentially influencing two coils using variable capacitance in which the signal transmitted is frequency or phase of ac using combination of fixed frequencies in which transmission is by pulses using a variable number of pulses in a train operating on dynamo-electric devices, e.g. step

19/26	• • by varying pulse repetition frequency
19/28	• • using pulse code
19/30	 in which transmission is by selection of one or more conductors or channels from a plurality of conductors or channels (<u>G08C 19/38</u> takes precedence)
19/32	. of one conductor or channel
19/34	• • of a combination of conductors or channels
19/36	 using optical means to covert the input signal {(characterised by optical transfer means <u>G01D 5/26;</u> optical analogue digital converters <u>G02F 7/00</u>)}
19/38	• using dynamo-electric devices (operated by pulses <u>G08C 19/20</u>)
19/40	• of which only the rotor or the stator carries a winding to which a signal is applied, e.g. using step motor
19/42	having three stator poles
19/44	• • • having more than three stator poles
19/46	• of which both rotor and stator carry windings (having squirrel-cage rotor <u>G08C 19/40</u>)
19/48	• • being the type with a three-phase stator and a rotor fed by constant-frequency ac, e.g. selsyn, magslip
21/00	Systems for transmitting the position of an object with respect to a predetermined reference system, e.g. tele-autographic system
23/00	Non-electrical signal transmission systems, e.g. optical systems
23/02	• using infrasonic, sonic or ultrasonic waves
23/04	• using light waves, e.g. infrared
23/06	
25/00	• through light guides, e.g. optical fibres
25/00 25/00	 through light guides, e.g. optical fibres Arrangements for preventing or correcting errors; Monitoring arrangements
	Arrangements for preventing or correcting errors;
25/00	Arrangements for preventing or correcting errors; Monitoring arrangements . by signalling back receiving station to transmitting
25/00 25/02	 Arrangements for preventing or correcting errors; Monitoring arrangements by signalling back receiving station to transmitting station
25/00 25/02 25/04	 Arrangements for preventing or correcting errors; Monitoring arrangements by signalling back receiving station to transmitting station by recording transmitted signals Transmission systems for measured values, control or similar signals Transmission systems of control signals via
25/00 25/02 25/04 2200/00	 Arrangements for preventing or correcting errors; Monitoring arrangements by signalling back receiving station to transmitting station by recording transmitted signals Transmission systems for measured values, control or similar signals

G08C

 2201/112 Mechanical energy, e.g. vibration, piezoelectric 2201/114 Solar power 2201/12 . Power saving techniques of remote control or controlled devices 2201/20 . Binding and programming of remote control devices 2201/21 . Programming remote control devices via third means 2201/30 . User interface 2201/31 . Voice input 2201/32 . Remote control based on movements, attitude of remote control device 2201/33 . Remote control using macros, scripts

2201/33 . Remote control using macros, scripts
2201/34 . Context aware guidance
2201/40 • Remote control systems using repeaters, converters,
gateways
2201/41 • Remote control of gateways
2201/42 • Transmitting or receiving remote control signals via a network
2201/50 • Receiving or transmitting feedback, e.g. replies,
status updates, acknowledgements, from the
controlled devices
2201/51 . Remote controlling of devices based on replies,
status thereof
2201/60 • Security, fault tolerance
2201/61 . Password, biometric
Rolling code
2201/63 Redundant transmissions
2201/70 . Device selection
. Directional beams
. Additional features
2201/91 . Remote control based on location and proximity
2201/92 Universal remote control
2201/93 Remote control using other portable devices, e.g.
mobile phone, PDA, laptop
2201/94 Smart cards
